[Master Label Reader Notes

** All pesticidal "germ" claims must be linked to bacteria (minimum Salmonella and Staph) and at least one virus and/or fungi. For example Front panel "Kills germs" Back panel "Kills Salmonella enterica Staphylococcus aureus Herpes Simplex virus type 2 and Influenza A virus/Hong Kong"*

A footnote can be used to list organisms. Bacteria, virus and fungi can be separated into footnotes 1, 2 and 3 if desired.

When organisms are listed next to a claim, the organisms may be listed in a footnote instead of directly next to the claim.

If one step cleaner claims used and HIV 1/ HBV/ HCV claims and/or directions for ultrasound transducers are included on the label, then the following also must be included on the same panel of the label:

▲ a pre cleaning step is required for HIV-1, HBV and HCV [and] [or] use on ultrasound transducers [or probes]. If HIV 1, HBV or HCV or ultrasound transducers are not listed on the label, any of the one step cleaning/disinfecting claims may be used without the phrase requiring pre cleaning.

Latin organism names are in italics; otherwise italics in brackets indicate reader's notes and are not part of labeling text.]
