[The following instructions are to be included on production labels when claims against HIV, and/or HBV and/or HCV are listed; one, two or all three of the viruses may be included on claims and directions in production labels.]

†KILLS HIV-1 (AIDS VIRUS), HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS [AND PRE-CLEANED EXTERNAL SURFACES OF ULTRASOUND TRANSDUCERS [PROBES]] PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in three (3) minutes at room temperature (68°- 77°F) or (20°- 25°C) in healthcare or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV).

†SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HEPATITIS B VIRUS AND HEPATITIS C VIRUS OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS

Personal protection: When using this product, wear disposable protective gloves, protective gowns, face masks, or eye coverings as appropriate when handling HIV-1 (AIDS Virus), HBV or HCV infected blood or body fluids.

Cleaning procedure: All blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection by the germicidal cloth. Open, and unfold first germicidal cloth to remove gross filth [or heavy soil].

Disposal of infectious materials: Dispose of used towelette in accordance with local regulations for infectious waste disposal.

Contact time: Use second germicidal cloth to thoroughly wet surface. Allow to remain wet three (3) minutes, let air dry. Although efficacy at a 30 second contact time has been shown to be adequate against HIV-1 (AIDS VIRUS), this time is not sufficient for the other non-HIV organisms listed on this label. Therefore, a 3 minute wet contact time must be used for all listed non-HIV organisms.

[Master Label Reader Notes

* All pesticidal "germ" claims must be linked to bacteria (minimum: Salmonella and Staph) and at least one virus and/or fungi. For example: Front panel: "Kills germs*" Back panel: "Kills Salmonella enterica, Staphylococcus aureus, Herpes Simplex virus type 2, and Influenza A virus/Hong Kong".

A footnote can be used to list organisms. Bacteria, virus and fungi can be separated into footnotes 1, 2 and 3 if desired.

When organisms are listed next to a claim, the organisms may be listed in a footnote instead of directly next to the claim.

If one step cleaner claims used and HIV-1/ HBV/ HCV claims and/or directions for ultrasound transducers are included on the label, then the following also must be included on the same panel of the label:

▲ a pre-cleaning step is required for HIV-1, HBV and HCV [and] [or] use on ultrasound transducers [or probes]. If HIV-1, HBV or HCV or ultrasound transducers are not listed on the label, any of the one step cleaning/disinfecting claims may be used without the phrase requiring pre-cleaning.

Sanitizing directions must be included on all labels with 99.9% claims; disinfection directions must be included on all labels with "germ" claims.

◆ Grease and soap scum claims are not to be used on labeling with one-step cleaning/disinfection claims.]
