WOODIE PENTA

PENTA WOOD PRESERVATIVE — PROTECT YOUR INVESTMENT
WOODIE Solution preserves wood by preventing dry rot or mildew. Also prevents attack by termites, carpenter ants and powder post beetles. The water repellency prevents warping, swelling or checking of wood and reduces paint peeling or blistering due to moisture absorption. WOODIE will not materially stain and may be overpainted or varnished after drying 24-48 hours.

- Shake well before using.
- First be sure wood is dry, clean and free of paint.
- For best results with brush, roller or spray, apply two coats allowing one hour for drying between coats.
- For stain finishes, oil colors should be added to WOODIE as stains will not adhere well over WOODIE.
- Fence posts or wood contacting soil should be free of bark, then immersed in solution overnight. The more preservative applied, the greater the protection.
- For treated construction lumber, apply a generous coat to new cuts.
- To protect your hands, wear rubber gloves.

WARNING: COMBUSTIBLE MIXTURE

KEEP AWAY FROM HEAT, SPARKS AND OPEN FLAME
CONTAINS MINERAL SPIRITS, PENTACHLOROPHENOL

If swallowed, do not induce vomiting, CALL PHYSICIAN IMMEDIATELY. Harmful if swallowed or absorbed through skin! Causes skin irritation! Do not breath vapor or spray mist, do not get in eyes, on skin or clothing. Wash exposed skin with soap after handling and before eating or smoking.

KEEP OUT OF THE REACH OF CHILDREN
USE ONLY WITH ADEQUATE VENTILATION

NOTE: Because this product is used under conditions beyond our control, it is impossible for seller to make warranty, express or implied, concerning it.
