## CHLORDANE 4E TERMITE CONTROL

To meet FHA termite proofing requirements, consult the latest editions of the Housing and Urban Development (HUD) Minimum Property Standards.

Add 1 gallon of Chlordane 4E to 47 gallons of water (1.0% emulsion).  
Apply the 1.0% emulsion as follows.

### 1-SLAB-TYPE CONSTRUCTION

**a** - Apply 1 gallon per 10 square feet as an overall pre-construction treatment under the slab and along attached porches or entrance platforms.

**b** - Apply 2 gallons per 5 lineal feet to critical areas under the slab as pre-construction treatment, such as along the inside and outside of the foundation walls and around utility entrances and interior partition foundation walls.

**c** - Apply 1 gallon per 5 lineal feet of wall to voids in hollow masonry units of the foundation.

trance platforms, utility entrances have covering slab on fill of ground.

**d** - Apply 1 gallon per 5 lineal feet of wall to voids in hollow masonry units of the foundation.

### 3-BUILDINGS WITH BASEMENTS

**a** - Apply 1 gallon per 10 square feet as an overall pre-construction treatment under the basement flooring, attached porches, entrance platforms, utility entrances, and similar situations where slab fill is at ground level.

**b** - Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation walls, including entrance platforms and porches where the foundation is not more than 15-18 inches deep. If over 15-18 inches deep but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.

**c** - Apply 2 gallons per 5 lineal feet as a trenching application to critical areas under the house, such as along the inside of foundation walls, porches, entrances and piers. If trench is deeper than 15-18 inches but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.

**d** - Treat all voids in hollow masonry units of the foundation at the rate of 1 gallon per 5 lineal feet of wall.

**Note:** For buildings with deep footings dig trench 30 inches deep. Do not dig trench below level of footing.

Premises treated with 1.0% Chlordane 4E will give residual control for a minimum of five years.

### 2-BUILDINGS WITH CRAWL SPACES

**a** - Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation walls, including entrance platforms and porches where the foundation is not more than 15-18 inches deep. If over 15-18 inches deep but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.

**b** - Apply 2 gallons per 5 lineal feet as a trenching application to critical areas under the house, such as along the inside of foundation walls and around piers and utility entrances. If trench is deeper than 15-18 inches but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.

**c** - Apply 1 gallon per 10 square feet of soil surface as a pre-construction treatment where the attached porches, en-

## FOR USE ON LAWNS AND SHRUBS

INSECTICIDE kills ants, chiggers, grasshoppers, cutworms, white grubs, sow bugs, mosquitoes, mole crickets, crickets, and other soil insects.

### CAUTION:

Keep out of reach of children, do not graze or feed treated grass to animals. Keep children and pets off treated lawns until this chemical has been washed into soil and lawn is completely dry. Harmful if swallowed. Repeated or prolonged contact with skin can cause toxic symptoms. Wash after handling. Avoid inhaling mist from spray. Avoid contamination of feed and foodstuffs.

Do not apply or allow to drift to areas occupied by humans or animals.

### PLEASE NOTE

After spraying with insecticide, prepare a 1% solution of household ammonia or baking soda and water. Allow Spray Gun to soak in this solution for 24 hrs.; then remove and rinse thoroughly with clean water.

#### ACTIVE INGREDIENTS

Technical Chlordane

16%

#### INERT INGREDIENTS

84%

Equivalent to 15% octachloro -4, 7-methanotetrahydroindane and 10% related compounds.

### DIRECTIONS FOR USE

One cartridge covers 150 sq. ft. Use adjustable type nozzle turned to a fine spray for surface insects. Soak thoroughly. One application remains effective for weeks against ants, chiggers and mosquitoes, but application should be repeated as needed. This insecticide will not injure grass and shrubs treated.

**IMPORTANT:** Remove screen when using weed killer or insecticide.

**NOTE:** Poisonous to fish and wild life.
