# ALGAECIDE

## SWIMMING POOL ALGAECIDE

**Active Ingredient:**

Poly (oxyethylene (dimethyliminio)  
 ethylene (dimethyliminio)-  
 ethylene dichloride..... 15.0 percent

Inert Ingredient..... 85.0 percent

**CAUTION:**  
**KEEP OUT OF REACH**  
**OF CHILDREN**

Manufactured By:

**WENSON CHEMICAL CO.**

**CAUTION:**  
**KEEP OUT OF REACH**  
**OF CHILDREN**

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact, flush with plenty of water for at least 15 minutes. If eye irritation persists, get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard container.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

**OKAY COOLING TOWER ALGAECIDE** is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime and other deposits. An initial slug addition of 4.0 to 10.0 fluid ounces of **OKAY COOLING TOWER ALGAECIDE** per 1000 gallons of water to provide a concentration of 32 to 80 parts per million of **OKAY COOLING TOWER ALGAECIDE** based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 1.0 to 10.0 fluid ounces of **OKAY COOLING TOWER ALGAECIDE** per 1000 gallons of water (8 to 80 parts per million of **OKAY COOLING TOWER ALGAECIDE**) should be employed every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.
