Available Chlorine

E.P.A. Reg. No. 9556-2

DANGER

Keep out of reach of children. May be fatal if swallowed. Do not breathe dust. May cause burns or damage the eyes. Do not get in eyes or on skin. In case of contact with skin or eyes flush with plenty of water. Avoid food contamination. Strong oxidizing agent. Protect from moisture contamination. Avoid contact with heat, moisture or organic matter. Contact with organic matter may cause fire. Keep container closed and in cool dry place when not in use. Rinse empty container thoroughly with water and discard.

ANTIDOTE

EXTERNAL—Immediately flush with plenty of water. For contact in eyes, get immediate medical attention.

INTERNAL—Feed bread soaked in milk followed by olive oil or cooking oil. **CALL A PHYSICIAN.**

Active Ingredients:

Trichloro-s-Triazinetrione	67%
Sodium Carbonate	33%

100%

Available Chlorine	56%

ATTACKS AND DESTROYS ALGAE ON POOL SIDES AND FLOORS

DIRECTIONS FOR USE

Algae Cure will amaze you with its speedy action. Shut off filter pump and allow water to settle. Do not start pump for 6 hours. Sprinkle generously along the walls where algae appears and over the surface of the water where algae is seen on pool bottom. It will settle through the water and kill the algae in a matter of hours. Two pounds will treat 10,000 gallons of pool water. If entire pool is treated according to above dosage, do not use pool for 24 hours. If small patches are treated and less than 1/2 pound per 10,000 gallons is used no restrictions on pool use need be imposed.

CAUTION:

Under certain conditions this product, because of its potency, may remove color from vinyl lined and painted pools. Discoloration can be prevented by brushing the granules lightly with a pool brush after they settle to the floor of the pool. The brushing action and movement of the granules distributes the strength so that the full effect is not concentrated on any one spot which may cause bleaching.
