ORTEX

WINTERIZING POWDER

Active Ingredients — Copper Sulfate Pentahydrate 24.5%
Inert Ingredients 75.5%

CAUTION: KEEP OUT OF REACH OF CHILDREN.
SEE FIRST AID & ADDITIONAL PRECAUTIONS ON SIDE PANEL.

DIRECTIONS

Use WINTERIZING POWDER on the basis of 8 oz. (1/2 lb) for every 5,000 gals. of pool water. Always dissolve the Winterizing Powder in a small quantity of water first, namely, 1 lb in 2 qts of water, 2 lbs in 4 qts, etc. Put the 2 qts of water into a 4 or 5 gal plastic pail, then pour the recommended 1 lb Winterizing Powder into the 2 qts of water and stir (approximately 5 minutes) until all particles are dissolved. Fill the plastic pail with pool water and pour the diluted solution into the edge of pool while walking around the entire perimeter of pool. Let filter run for several hours for good distribution. Ortex Winterizing Powder must be added to pool water algae free. For best results, clean and superchlorinate pool water for several hours prior to adding this product. Cover pool after use.

WINTERIZING POWDER

Keeps pool water crystal clear and algae free.

CAUTION

Keep out of reach of children. Harmful if swallowed. If applied to skin or in the eyes, flush with plenty of cold water. If irritation persists, get medical attention. Do not re-use container. Destroy when empty.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as directed on the label. NOTE—Do not allow this chemical to enter its original concentrated form, to come in contact with any other pool maintenance chemical or to be mixed with concentrated form as a violent reaction may occur.
