THIS PRODUCT . . .

. . . is a high quality, low cost type acting disinfectant. Its water emulsions are powerful cleaners in dissolving grease and grime, and leaving clean, sanitary surfaces.

DIRECTIONS FOR USE

Mix one part of this product to forty parts of luke warm water to make a stable, milky emulsion for general cleaning and deodorizing. Never use boiling water. If conditions are unusually foul, concentrations up to 10 percent may be used. A better emulsion will be formed if the water is added to the product rather than adding this product to water.
