

## DIRECTIONS FOR USE

### GENERAL:

Apply with a low-pressure spray equipment with a coarse spray nozzle. Spray surfaces only, not water. Avoid excessive run-off. Apply to all insect hiding places and harborage. Also treat adjacent exposed surfaces where insects may crawl when they come out of hiding. Repeat treatment as necessary.

**Cockroaches:** Thoroughly treat the infested area. Spray baseboards, cracks and crevices around window and door frames, the under surfaces of shelves, drawers and work tables, behind and beneath cupboards, refrigerators, sinks and stoves, and around waste containers, curtain panels, ventilation boxes, floor drains and other places where cockroaches hide or rest.

**Ants:** Apply to trails and places where they enter premises such as window frames and door sills. Spray lawns and runways outdoors. **Stored Grain Pests:** aids in controlling Cadellids, Cigarette Beetles, Dermestids, Drugstore Beetles, Indian Meal Moths, Mediterranean Flour Moths, Red Flour Beetles, and Sawtoothed Grain Beetles, exposed stages - Thoroughly treat floors and the walls of the infested area with attention to cracks, crevices, corners and pedestals. Sanitation and dust control are of primary importance. Fumigate or destroy infested products.

**Silverfish, Firebrats:** Apply to localized areas infested by these insects. Spray baseboards, window frames, door frames, and storage areas.

**Brown Dog Ticks:** spray, sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Repeat as needed. Fresh bedding should be placed in animal quarters after spraying. Do not spray animals.

**Clover Mites, Crickets, Earwigs, Millipedes, Centipedes, Sowbugs, Scorpions and Spiders:** Thoroughly spray the interior and exterior perimeter of the infested premises. For Clover Mites, give special attention to window sills. **Fleas, Flies, Gnats, Mosquitoes, Punksies, and Sandflies (outdoors only):** Spray infested areas thoroughly, including outside surfaces of screens, doors, window frames, foundations, patios and other areas where insects may enter.

**FOOD HANDLING ESTABLISHMENTS:** Places other than private residences in which exposed food is held, processed, prepared or served.

**FOOD AREAS: APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY.** Includes areas for receiving, storage, packing, rearing, bottling, wrapping, boxing, preparing, edible waste storage and enclosed processing systems, mills, tanks, etc. in the areas of serving areas (when food is exposed and facility is in operation also would be considered a food area).

Apply in small amounts directly into cracks and crevices using equipment capable of delivering a thin stream of insecticide to all parts of various different elements of construction between equipment and floors, openings leading to voids and narrow spaces in walls, equipment legs and bases, where exposed stages of stored grain pests, cockroaches and ants hide. Prior to application, deenergize electrical equipment. After application, allow time for oil to evaporate before starting motors or placing switches in the "ON" position.

Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

**APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.**

**Insect Control in Research Facilities:** The use of Residual Spray in and around research animal quarters for insect control will not induce changes in liver microsomal enzyme activity in these animals.

## INDUSTRIAL & INSTITUTIONAL INSECT SPRAY

**KILLS:** Ants, Gnats, Fleas, Ticks, Brown Dog Ticks, Flies, Gnats, Mosquitoes, Punksies, Crickets, Millipedes, Centipedes, Scorpions, Silverfish, Sandflies, Sow Bugs, Clover Mites, Earwigs, Firebrats, Exposed stages of Caddellids, Cigarette Beetles, Dermestids, Drugstore Beetles, Indian Meal Moths, Mediterranean Flour Moths, Red Flour Beetles, and Sawtoothed Grain Beetles.

### ACTIVE INGREDIENTS:

0 - Isopropoxyphenyl methylcarbamate	1%
2 - Butoxyethanol	9%
Petroleum Distillate	90%

NET CONTENTS ONE GALLON

CAUTION: KEEP OUT OF REACH OF CHILDREN  
(See Side Panel for Additional Information)

ACU  
FEB 11 1975  
Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the purposes registered under E.P.A. Reg. No. 9591-26.

**NATIONWIDE EXTERMINATING**

Nationwide Exterminating Residual Spray is a highly effective ready-to-use formulation for control of the insects listed, including those resistant to certain chlorinated hydrocarbon and phosphorus insecticides. This product drives insects from their hiding places, gives rapid kill, and long residual activity.

### RESTRICTIONS

Do not use as a space spray. Provide adequate ventilation of area being treated. Do not allow children to contact treated areas until surfaces are thoroughly dry. Do not store near feed or food products. Avoid contamination of feed, food processing equipment and handling surfaces. Do not apply to animals. Remove pets and cover fish bowls before spraying. Do not spray plants.

### CAUTION

May be harmful if swallowed. May be absorbed through the skin. Do not get in eyes, on skin or on clothing. Avoid breathing of spray mist. In case of contact, wash immediately with soap and warm water. Wash hands, arms and face thoroughly with soap and water before eating or smoking. Wash all contaminated clothing with soap and hot water before re-use. Should illness occur, get prompt medical aid. To physician: Atropine sulfate, 5-10 mg. tid. Do not use, pour, spill or store near heat or open flame.

"This product is toxic to fish, birds, and other wild life."

"Keep out of lakes, streams, or ponds."

"Do not contaminate water by cleaning of equipment or disposal of wastes."

"Apply this product only as specified on this label."

### CONTAINER DISPOSAL

Do not re-use empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.
