ICC 237 is a concentrated color indicating solution of Sodium Hypochlorite. Useful as disinfectant, sanitizer, destainer and deodorizer.

DIRECTIONS

FOOD PROCESSING PLANTS:

GENERAL DISINFECTION OF POROUS SURFACES (floors, walls, tables, cutting blocks).

Remove all food products from contact or cover up. Depending on the degree of soiling, apply without or with the presence of a suitable alkaline cleaner* at a minimum concentration of 0.55 fl. oz. of ICC 237 per 1 gallon of water. (600 ppm available chlorine). Follow with a rinse of potable water. Let drain and remove any collection of liquid before contact with food is re-established.

SANITATION OF EQUIPMENT AND UTENSILS (hard-non-porous surfaces).

Remove all food products from contact with equipment and utensils, or cover. Clean with a suitable cleaner* for the soil. If testing facilities are available, rinse with a solution containing 0.09 fluid oz. of ICC 237 per 1 gallon of water (100 ppm av. chlorine) and adjust concentration periodically to prevent it from falling below 50 ppm. Otherwise use 0.18 fl. oz. of ICC 237 per 1 gallon of water (200 ppm av. chlorine) as starting solution. Let thoroughly drain and remove any collection of liquid before contact with food is made. Rinsing with potable water is not necessary if directions are followed.

*Our Sales Representative will recommend such cleaners.

237 DISINFECTANT, SANITIZER, DESTAINER AND DEODORIZER

ACTIVE INGREDIENTS

SODIUM HYPOCHLORITE 12.50%
POTASSIUM PERMANGANATE 0.01%

INERT INGREDIENTS 12.51%
TOTAL 87.49%
100.00%

AV. CHLORINE 11.88%

WARNING!
KEEP OUT OF REACH OF CHILDREN.
See other precautions on right side of panel.

EPA REG. NO.: 9594-5

NET GALS

WARNING Harmful if Swallowed

Causes eye and skin irritation. Avoid contact with eyes, skin or mucous membrane. NOT FOR DRUG USE. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician. Flush skin with water.

ANTIDOTE:

EXTERNAL: FLOOD WITH WATER.

INTERNAL: FEED Raw Egg White, several glasses of water or milk, or Cooked Cereal followed by Olive Oil or Cooking Oil. CALL A PHYSICIAN.

DEGRADES WITH AGE. USE A TEST KIT AND INCREASE DOSAGE AS NECESSARY TO OBTAIN REQUIRED LEVEL OF AV. CHLORINE.

DO NOT MIX WITH ACIDIC TYPE CLEANING COMPOUNDS.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT.

**237A
DISINFECTANT, SANITIZER,
DESTAINER AND DEODORIZER**

ICC 237A is a concentrated solution of Sodium Hypochlorite. Useful as disinfectant, sanitizer, destainer and deodorizer.

DIRECTIONS

FOOD PROCESSING PLANTS:

GENERAL DISINFECTION OF POROUS SURFACES (floors, walls, tables, cutting blocks).

Remove all food products from area or cover up. For gross filth or heavy soil preclean surface with a suitable cleaner.* Then apply 0.54 fl. oz. of ICC 237A per 1 gallon of water (600 ppm available chlorine) so as to thoroughly wet surfaces with the solution. Follow with a rinse of potable water. Let drain and remove any collection of liquid before contact with food is re-established.

SANITATION OF EQUIPMENT AND UTENSILS (hard-non-porous surfaces) Remove all food products from contact with equipment and utensils, or cover. Clean with suitable cleaner* for the soil. If testing facilities are available, rinse with a solution containing 0.09 fluid oz. of ICC 237A per 1 gallon of water (100 ppm av. Chlorine) and adjust concentration periodically to prevent it from falling below 50 ppm. Otherwise use 0.18 fl. oz. of ICC 237A per 1 gallon of water (200 ppm av. chlorine) as starting solution. Let thoroughly drain and remove any collection of liquid before contact with food is made. Rinsing with potable water is not necessary if directions are followed.
