lating commercial and industrial water cooling
rior to its use, systems must be cleaned to
lgal growth, microbiological slime and other
An initial slug addition of 13 to 35 fluid
ICC W-62 per 1000 gallons of water to pro-
centration of 100 to 250 parts per million of
based on the total weight of water in the
recommended. Repeat initial dosage until
evident. Subsequent slug additions of 3.5 to
ounces of ICC W-62 per 1000 gallons of water
50 parts per million of ICC W-62) should be
every 2 to 5 days or as needed. The fre-
f addition depends upon the relative amount
ff and the severity of the microbiological
Slug additions should be made in the sump of
ing towers.

ICC W-62

FOR ALGAE CONTROL IN COOLING TOWERS

ACTIVE INGREDIENT:

Poly [oxyethylene (dimethyliminio) ethylene
(dimethyliminio) ethylene dichloride] 4.8%

INERT INGREDIENT 95.2%
100.0%

CAUTION

KEEP OUT OF REACH OF CHILDREN

See additional cautions on right side panel

Net Gallons
EPA REG. NO.: 9594-9

CAUTION

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact, flush with plenty of water for at least 15 minutes. If eye irritation persists, get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard container.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply ICC W-62 only as specified on this label. Do not contaminate water by cleaning of equipment or disposal of waste.
