

DIRECTIONS

For Industrial Recirculating Cooling Water systems: When the system is noticeably fouled, apply 45 to 88 oz. AV (40 to 78 fl. oz.) of ICC W-68 for each 1000 gallons of water in the system. Repeat until control is achieved.

Subsequent dose: When algae control is evident, add 23 to 44 oz. AV (21.5 to 39 fl. oz.) of ICC W-68 for each 1000 gallons of water in the system every week or as needed to maintain control. Badly fouled systems must be cleaned before treatment is begun. Generally begin treatment when the system is in jeopardy of becoming affected or after cleaning systems whose efficiency is already impaired. Addition should be at a point in the system where the product will be uniformly mixed. Our salesman will, on request, advise you as to the specific site problems of your system and to the use of proper cleaning methods and ICC cleaning products.

W-68

An Effective Algicide For Industrial Recirculating Cooling Towers

ACTIVE INGREDIENTS

Sodium Pentachlorophenate 11.06%
 Sodium salts of other chlorophenols .. 1.54%
INERT INGREDIENTS 87.40%

DANGER

KEEP OUT OF REACH CHILDREN
 See First Aid and other precautions on right side of panel.
