PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Remove pets, birds and cover fish aquaria before spraying. Do not breathe spray mist. Wear mask or respirator of a type recommended by the U.S. Bureau of Mines, NIOSH or OSHA to give adequate protection against this material. Wear protective clothing. Wash exposed skin surfaces with soap and water after handling and before eating or smoking. Wash all contaminated clothing with soap and water before reuse. Do not apply as a space spray while food processing is underway. Except in Federally inspected meat and poultry plants when applied as a surface spray with care and in accordance with the directions and precautions given above, food processing operations may continue. Do not apply at any time as a undiluted space spray in edible product areas of Federally inspected meat and poultry plants. Foods should be removed or covered before treatments. Thoroughly wash all food processing surfaces before reuse. In Federally inspected meat and poultry plants, all surfaces in processing areas must be washed and rinsed in potable water after spraying.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to lakes, streams, ponds, tidal marshes, and estuaries. Do not contaminate water by cleaning of equipment or disposal of wastes.

CHEMICAL HAZARDS

Do not use or store near heat or open flame. Buyer assumes all risks of use, storage or handling of this product. For structural use, conform with directions given hereon.

STORAGE AND DISPOSAL

Do not contain in water, food or feed by storage or disposal.
PESTICIDE DISPOSAL: Pesticide spray mixture or rinse water that cannot be used as directed later instructions must be disposed of according to applicable Federal, State or local procedures.
CONTAINER DISPOSAL: Triple rinse or equivalent. Then recycle where possible. Do not reuse or refill as a container for other pesticides, herbicides and/or other products.

I.C.C. CHEMICALS
AQ-30
AQUEOUS
SPRAY
CONCENTRATE

For Use In Food Processing and Storage, Mushroom Houses, Hospitals, Hotels, Motels, Restaurants, Other Institutions and In Residences.

Authorized For Use Under USDA Inspection and Grading Programs.

Provides Rapid Kill of Insects Without Leaving Objectionable Residues.

Food additive tolerances have been established for the insecticide components in this product. When this product is used as directed, allowable tolerance levels will not be exceeded.

ACTIVE INGREDIENTS

Pyrethrin	1.00
Pyrethrin Butylate	1.00
Pyrethrin Dodecylate	1.00
INERT INGREDIENT	97.00
Total	100.00

See label for use instructions and directions for application.

KEEP OUT OF REACH OF CHILDREN
CAUTION
 See left panel for additional precautions

NET CONTENTS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

To prepare dilutions the concentrate should first be stirred or agitated well. Add the required amount of concentrate to water and blend thoroughly. This will produce a stable microemulsion.

For maximum effectiveness, a combination of localized surface application and space treatment is recommended.

AS A SURFACE SPRAY: For initial clean up of severe insect infestation, dilute at a rate of 1 part concentrate in 14 parts water (8.5 fluid ounces per gallon). This dilution may not be used in edible product areas of Federally inspected meat and poultry plants. In these plants and for normal infestations dilute 1 part concentrate in 29 parts water (4.3 ounces per gallon).

To control cockroaches, ants, silverfish, spiders, crickets, clover mites, cheese mites, granary weevils, rice weevils, confused flour beetles, rust red flour beetles, sawtoothed grain beetles, spider beetles, cigarette beetles, drugstore beetles, meal worms, grain mites and caddisflies. Use a good sprayer adjusted to deliver a coarse wet spray. Direct the spray into hiding places, cracks and crevices, under pallets, around containers of stored foods, around the base of machinery, behind shelves and drawers. Spray bookcases for silverfish. Spray ant trails, nests and points of entry. If surface application only is to be used, spray floors, walls and other surfaces applying at a rate of 1 gallon to 750 square feet of surface.

To control carpet beetles, spray edges of carpeting and under carpeting and rugs. Make localized application to floor and baseboards. Spray directly into cracks, closets and infested areas of shelving. Repeat treatment as needed.

To control bedbugs, spray mattresses lightly, particularly around tufts and seams. Take beds apart and spray in all joints. Treat baseboards, moldings and floors. Repeat treatment as needed.

To control fleas and brown dog ticks, thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames and localized areas of floor and floor covering. Fresh bedding should be placed in animal quarters following treatments. To kill fleas and ticks on cats and dogs, and to obtain protection against reinfestation, dilute at 1 part concentrate to 49 parts water (2.5 fluid ounces per 1 gallon) and wet the animal by dipping or spraying.

AS A SPACE SPRAY: Dilute at a rate of 1 part concentrate to 59 parts water (2 fluid ounces per gallon). Apply with mechanical or compressed air equipment (non-thermal) adjusted to deliver a fine mist. Close doors and windows and shut off ventilating systems. For rapid control of adult house flies, fruit flies, gnats, mosquitoes, skipper flies, wasps, hornets, Angoumois grain moths, Mediterranean flour moths, Indian meal moths and tobacco moths. Direct spray at an upward angle dispersing it uniformly through the entire area at a rate of 1 ounce per 100 cubic feet of space. Keep area closed for at least 10 minutes. Ventilate and sweep up dead insects before reoccupying.

For rapid kill of exposed or accessible stages of other insects named on this label, dilute 1 part concentrate in 5-29 parts water (4 to 25 ounces per gallon). Apply using conventional mechanical or compressed air equipment (non-thermal) following directions for space spraying. Apply the above dilutions at a rate of from 1 to 10 ounces per 1000 cubic feet of space. When used in meat and poultry processing plants, a dilution of 1 part to 10 parts is acceptable and it must be dispersed from equipment adjusted to deliver an aerosol spray, no droplets over 50 microns in diameter and 90% less than 30 microns.

IN MUSHROOM PRODUCTION AND PROCESSING: To control mushroom flies or fungus gnats, Phorids, Sciarids, and other mushroom growing fungus, dilute 1 part concentrate in 5 parts water (2 fluid ounces per gallon). Use a good sprayer adjusted to deliver a coarse wet spray. Adjust the sprayer to deliver a coarse wet spray. Operate at 8 to 10 feet above the mushroom bed. The sprayer should be operated 8 to 10 feet above the mushroom bed. The sprayer should be operated 8 to 10 feet above the mushroom bed. The sprayer should be operated 8 to 10 feet above the mushroom bed. The sprayer should be operated 8 to 10 feet above the mushroom bed.
