

**RAT & MOUSE
BAIT
WITH
FUMARIN
READY TO USE**

Active Ingredient:
3—(Alpha-Acetonylfurfuryl)—
4—Hydroxycoumarin 0.025%
Inert Ingredients 99.975%
**FUMARIN RAT & MOUSE
BAIT** contains an anticoagu-
lant chemical. Its remarkable
killing power depends on its
being consumed regularly in
small doses for a period of
days—usually 5 to 14. It has
unusual properties which
make this technique practi-
cal.

CAUTION

**KEEP OUT OF REACH
OF CHILDREN**

If swallowed by humans, do-
mestic animals, or pets, this
material may reduce the clot-
ting ability of the blood and
cause bleeding. In such case,
intravenous and oral adminis-
tration of Vitamin K com-
bined with blood transfusions
may be indicated, as in the
case of hemorrhage caused
by overdoses of bishydroxy-
coumarin.

POISON

DIRECTIONS

Place **FUMARIN RAT &
MOUSE BAIT** in shallow con-
tainers in dry locations
where the rats and mice or-
dinarly feed, water, travel,
or live. Baits should be
placed in corners, along
walls, etc., and protected so
that children, pets, or domes-
tic animals won't disturb
them. For rats, use 1 or 2 bait
placements at points of great-
est activity. For mice, locate
tablespoon quantities of bait
at 6-10 foot intervals where
mice are active. Inspect feed-
ing stations daily and add
bait as needed; never allow
a station to remain empty
over 48 hours. If bait be-
comes sour, moldy, or other-
wise decomposed, it should
be replaced promptly.

**ARROWHEAD
PEST CONTROL
2205 WINTER STREET
SUPERIOR, WISCONSIN**

Net Wt. 3 oz.
USDA Reg. No. 9606 1
