powder

ODORLESS-NON-STAINING

ACTIVE INGREDIENT

Orthoboric acid 99.00%

INERT INGREDIENT . . . 1.00%

U.S.D.A. REG. NO. 96291

NET WT. 1 lb.

PAT. PEND.

CAUTION: KEEP OUT OF REACH OF CHILDREN. SEE BACK PANEL FOR ADDITIONAL CAUTIONS—WHEN CHILDREN ARE OCCUPANTS OF PREMISES SPECIAL PRECAUTIONS SHOULD BE TAKEN SO THAT ALL RESIDUE WILL BE OUT OF REACH OF CHILDREN.

COPPER BRITE'S ROACH POWDER is a white free-flowing powder that is non-staining and non-volatile. The powder carries an electric charge that causes it to adhere to the insect, insuring intimate contact and kill. Copper Brite's Roach Powder acts slowly but certainly, and when properly applied will kill the roach population within 7 to 10 days. Copper Brite's Roach Powder will remain active and effective for long periods of time; reapply as necessary.

DIRECTIONS FOR APPLYING COPPER BRITE'S ROACH POWDER:

Apply Copper Brite's Roach Powder with a teaspoon, scattering **liberally** under and behind refrigerator, stove, dishwasher, washing machine and dryer. Place in all lower drawers in kitchen, bath and closets and scatter **liberally** in drawer wells. Spread 1/2 teaspoonful in each corner of shelves in kitchen, bath and closets. Place Copper Brite's Roach Powder in all cracks under sink and any other inaccessible area using **all** the powder except for one teaspoonful.

COPPER BRITE'S ROACH TRAP. This container becomes the roach trap after the Copper Brite's Roach Powder has been applied. A special slippery inner coating prevents the roach from getting out once it enters. Effective roach control is assured by the 7 day action of the trap plus the long lasting effect of the applied Copper Brite's Roach Powder.

DIRECTION TO USE TRAP:

One teaspoonful of Copper Brite's Roach Powder should be left in container. Cut up 1/2 slice of fresh bread into 1 inch squares and place in container. Place container in kitchen on highest shelf out of the reach of children. In seven days remove container and discard out of the reach of children and pets.

NOTICE

Copper Brite's Roach Powder can destroy vegetation. Do not place in flower pots or on grass, trees, etc.

CAUTION

Do not place Copper Brite's Roach Powder on open floor. It should be placed in such a manner that it cannot be reached by children or pets. The amount of Copper Brite's Roach Powder placed in cupboards, closets, under the sink and other **accessible** locations should be limited to 1/2 teaspoonful on each spot treated. Do not leave container where children or animals may take interest. Avoid contamination of feed and foodstuffs.
