**FOR USE IN: HOMES, APARTMENTS, HOSPITALS, HOTELS,
SCHOOLS, FACTORIES, RESTAURANTS, MILITARY BASES**

ACTIVE INGREDIENT

BORIC ACID 99.00%

USDA REG. NO. 9608-2

INERT INGREDIENT 1.00%

COPPER BRITE'S ROACH POWDER: is a white free-flowing powder that is odorless, non-staining and non-volatile. The powder carries an electrostatic charge that causes it to adhere to the insect, insuring intimate contact and kill. Copper Brite's Roach Powder acts slowly but continuously and when properly applied will kill the roach population within 7 to 10 days. Copper Brite's Roach Powder will remain active and effective for long periods of time, reapply as necessary.

RECTIONS FOR APPLYING COPPER BRITE'S ROACH POWDER: Apply Copper Brite's Roach Powder with a teaspoon, bulb duster or bellows type hand duster, scattering liberally into wall voids, under and behind refrigerator, stove, dishwasher, washing machine and dryer. Remove all lower drawers in kitchen, bath and closets and scatter liberally in drawer wells. Spread 1/2 teaspoonful in each corner of shelves in kitchen, bath and closets. Place Copper Brite's Roach Powder in all cracks under sink and any other inaccessible area using one pound of powder for average 6 room dwelling.

CAUTION: Keep out of reach of children. When children are occupants of premises special precautions should be taken so that all residue will be out of reach of children. Do not place Copper Brite's Roach Powder on open floor. It should be placed in such a manner that it cannot be reached by children or pets. The amount of Copper Brite's Roach Powder placed in cupboards, closets, under the sink and other accessible locations should be limited to 1/2 teaspoonful in each spot treated. Do not leave container where the children or animals may take internally. Avoid contamination of feed and foodstuffs. Do not use in edible products areas of food processing plants.

NOTICE: Copper Brite's Roach Powder can destroy vegetation. Do not place in flower pots or on grass, trees, etc.
