**termite
prufe™**

ODORLESS NON-FLAMMABLE

NET WT. 1 lb. - Makes 1 GAL. Covers 200 sq. ft.

CAUTION: KEEP OUT OF REACH OF CHILDREN.
(SEE DIRECTIONS AND CAUTIONS ON BACK PANEL)

From Copper Brite® Inc.
makers of Roach Prufe®

Active Ingredients:
Disodium Octaborate Tetrahydrate
($\text{Na}_2\text{B}_8\text{O}_{13} \cdot 4\text{H}_2\text{O}$) 98.00%
Other Ingredients: 2.00%

EPA Reg. No. 9608-3
EPA EST. No. 9019-OH-2

293

Termite Prufe™ is effective for all interior and exterior lumber, plywood, logs, and wood-form composite structural components. It can be used for infested wood, as a preventative treatment in existing structures, and for pre-treatment during construction. The solution continues to penetrate deep into wood and does not break down, giving long lasting protection.

Directions for use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Mixing: (1 lb makes 1 gal. - Covers 200 sq. ft.) Fill bucket with about 80% of a gallon of water. While stirring add 1 lb of Termite Prufe powder, then add water to make 1 gal. Stir until dissolved crystal clear, approximately 5 minutes (quicker in warm water). **Note:** Stores indefinitely in sealed plastic container. Use duplicate label enclosed to securely affix to stored solution. If settles, bring to room temp. and stir.

Application: Solution can be applied with paint brush, roller or trigger spray bottle. Garden tank sprayer works best for attics, crawl spaces, decks, fences, logs and new construction. Wood surface should be clean, dry and unsealed before treating. Apply solution until wood surface is thoroughly wet. Apply second application after 1 to 24 hours. Applications can also be made by drilling approximately 1/4" holes and injecting solution into wood and/or wall voids. Avoid drilling into plumbing and/or spraying electrical installations. Any white residue can be easily removed or equipment cleaned with warm water and a mild soap solution. Wood should be completely dry (at least 48 hours) before applying paint, varnish or a waterproofing seal. Avoid contact with plant life.

When replacing unsound wood: Treat surrounding area and all sides of new wood with 2 applications before installing.

Pre-treatment during construction: Apply solution to all accessible surfaces of bare wood, plywood and wood-form composite until surface is thoroughly wet. Apply second application after 1 to 24 hours. Apply after roofing and framing are in place and before insulation and dry walls are installed. Protect treated wood from rain.

Note: Correct leaks and moisture exposure that cause infestation. Wood exposed to moisture should be sealed after treatment. Not recommended for portion of wood that is in direct contact with soil. When glueing wood, treat only after glue is dry. We recommend a small patch test before general application.

Precautionary statements:

Hazards to humans and domestic animals. CAUTION: Harmful if swallowed or inhaled. Causes moderate eye irritation. Avoid contact with

eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing before reuse.

Statement of practical treatment:

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting. **If Inhaled:** Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention. **If In Eyes:** Flush eyes with plenty of water. Call a physician if irritation persists.

Environmental hazards: Termite Prufe powder or solution carelessly spilled or applied to cropland or growing plants, including trees and shrubs, may kill or seriously retard plant growth. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Protective equipment: Wear waterproof gloves, eye protection, protective clothing (e.g. long sleeve shirt and shoes) and a MSHA/NIOSH approved dust/mist mask respirator (in confined spaces) when applying solution.

Storage and disposal: Do not contaminate water, food or feed by storage or disposal. Storage: Store in a dry place. Do not store where children or animals may gain access. Pesticide disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container disposal: Do not reuse empty container. Wrap container and put in trash collection.

Notice: Neither manufacturer nor seller makes any warranty expressed or implied concerning use of this product other than indicated on label. Buyer assumes all responsibility for safety and use not in accordance with directions. Because of varying conditions affecting use and application, complete prevention of decay by fungi, other organisms or infestations cannot be guaranteed. This product may be used to impart a temporary resistance at these places of attack which may aid in the prevention of immediate reinfestation. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement, particularly where use of other insecticides may pose an odor problem.
