JUL 28 1974

UNDER THE FEDERAL INSECTICIDE FUNGICIDE AND RODENTICIDE ACT FOR ECONOMIC POISON REGISTERED UNDER NO. 9610-7 SUBJECT TO ATTACHED COMMENTS.

A Highly Effective
Algaecide-Germicide
For Maintaining Clear,
Clean, Sparkling Pool
Water.

Large 3" diameter
Slow Dissolving Tablets
Provide Continuous
Chlorination of
Swimming Pool Water.

DANGER: KEEP OUT OF REACH OF CHILDREN

Harmful or fatal if swallowed. CORROSIVE. Causes severe eye damage and skin irritation. May cause irritation to nose and throat if inhaled. See First Aid and other precautions on the back/side panel.

ACTIVE INGREDIENT
Trichloro-s-triazinetriene
INERT INGREDIENTS

99.5%
0.5%

(90% AVAILABLE CHLORINE)

E.P.A. Reg. No. 9610-7

E.P.A. Est. No. 9610-CA-1

Dist. by POOLMASTER, INC. 160 Jefferson, Menlo Park, CA 94025

NET WT.

P.M. 90 SUPER SWIMMING POOL CHLORINE TABLETS

DIRECTIONS

For freshly filled pools or pools that have been using other materials for chlorination, water preparation, conditioning is necessary in order to obtain the maximum efficiency from P.M. 90 SUPER CHLORINE TABLETS.

CONDITIONING

1. Filter should be clean. As a precautionary measure, filter should be backwashed and allowed to operate continuously for at least 8 hours. Do not add Alum to sand and gravel filters for at least 24 hours.

One P.M. 90 SUPER tablet immersed in water will yield approximately 1.0-1.5 ppm of available chlorine for up to 10,000 gallons of pool water. Two tablets will so chlorinate 20,000 gallons of pool water and so on. P.M. 90 SUPER CHLORINE TABLETS dissolve slowly and provide continuous chlorination of pool water for several days. Amount and frequency of application will vary with water temperature and bather load. Test chlorine level daily with a chlorine test kit and adjust tablet usage as necessary to maintain a chlorine residual of 1.0-1.5 ppm.

P.M. 90 SUPER SWIMMING POOL CHLORINE TABLETS

DIRECTIONS

For freshly filled pools or pools that have been using other materials for chlorination, water preparation, conditioning is necessary in order to obtain the maximum efficiency from P.M. 90 SUPER CHLORINE TABLETS.

CONDITIONING.

1. Filter should be clean. As a precautionary measure, filter should be back-washed and allowed to operate continuously for at least 8 hours. Do not add Alum to sand and gravel filters for at least 24 hours.
2. Water should be tested with an accurate test set. Test the pH level and adjust it to 7.4-7.8. If the pH is below 7.4, add POOLMASTER pH CORRECT to raise it. If pH is above 7.3, add POOLMASTER DRY ACID.
3. Gradually add 2-1/2 lbs. of POOLMASTER "PREP" for each 10,000 gallons of water through surface skimmer. Care should be taken to break up any lumps that may form. For best circulation, shut off the main drain to increase the water flow through the skimmer.
4. Allow one to two hours for total dispersal. Test water again and adjust pH to 7.4-7.8.
5. Superchlorinate with 8 oz. of calcium hypochlorite or with 1 gallon of 10 - 14% sodium hypochlorite for each 20,000 gallons of water. Caution - never permit swimming or swimmers during superchlorination period or while chlorine residual is above 2.0 ppm. This superchlorination is necessary for proper water conditioning to make certain chlorine demand (the level of chlorine needed in pool water to kill bacterial) is satisfied prior to beginning regular treatment.
6. Check the chlorine residual the following day. If the chlorine test shows less than 1.0 ppm chlorine residual, repeat the same superchlorination as explained above. An available chlorine residual of 1.0 - 1.5 ppm must be maintained. Never permit the residual to go below 1.0 ppm at any time.

REGULAR TREATMENT

Simply drop P.M. 90 SUPER CHLORINE TABLETS into the skimmer basket or into a floating dispenser as needed to maintain a chlorine residual of 1.0-1.5 ppm. Test chlorine level daily.

One P.M. 90 SUPER tablet immersed in water will yield approximately 1.0-1.5 ppm of available chlorine for up to 10,000 gallons of pool water. Two tablets will so chlorinate 20,000 gallons of pool water and so on. P.M. 90 SUPER CHLORINE TABLETS dissolve slowly and provide continuous chlorination of pool water for several days. Amount and frequency of application will vary with water temperature and bather load. Test chlorine level daily with a chlorine test kit and adjust tablet usage as necessary to maintain a chlorine residual of 1.0-1.5 ppm. When using P.M. 90 SUPER CHLORINE TABLETS as a refill for automatic chlorinators see the chlorinator instructions from the chlorinator manufacturer.

DANGER: CORROSIVE. Do not take internally. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Causes burns on broken skin. Wear goggles or face shield and rubber gloves when handling. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a Physician. Remove and wash contaminated clothing before reuse. Internally - if swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a Physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

STORE IN A COOL, DRY, WELL VENTILATED AREA. Corrosive. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Oxidizing materials; do not mix with other chemicals. Contact with organic matter, heat, moisture may cause fire. Will burn with evolution of chlorine or equally toxic gases. Rinse empty container thoroughly with water and discard it.

**P.M. 90 SUPER
SWIMMING POOL CHLORINE TABLETS**

DIRECTIONS

1. For new pools, add 1 tablet per 10,000 gallons of water.
2. For existing pools, add 1 tablet per 10,000 gallons of water.
3. Add tablets to the pool at the same time each day.
4. Do not use in swimming pools.
5. Do not use in hot tubs.
6. Do not use in spas.
7. Do not use in whirlpools.
8. Do not use in fountains.
9. Do not use in decorative ponds.
10. Do not use in ornamental water features.
11. Do not use in waterfalls.
12. Do not use in streams.
13. Do not use in rivers.
14. Do not use in lakes.
15. Do not use in oceans.
16. Do not use in any other body of water.
