

NEW FIRE RESISTANT
CRYSTAL AQUA
CONCENTRATED POOL CHLORINE

- FEATURES A DRY CHLORINE THAT DISSOLVES IMMEDIATELY.
- A MOST EFFECTIVE GERMICIDE AND ALGACIDE.
- WILL NOT CAUSE CLOUDINESS IN WATER.
- WILL NOT ADD SCALE FORMING MINERALS IN THE WATER.
- WILL MAINTAIN YOUR POOL CRYSTAL CLEAR.
- FLAME-RESISTANT

The control of pH is greatly simplified using Crystal Aqua concentrated Pool Chlorine. In fact, you will require from 1/4 to 1/2 times the amount of acid usually applied. Crystal Aqua Concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need to apply Crystal Aqua concentrated Pool Chlorine less often.

INSTRUCTIONS

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. Crystal Aqua concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning, add Crystal Aqua cyanuric acid at the rate of 4 oz. per 1,000 gallons to stabilize the pool. Crystal Aqua concentrated Pool Chlorine should be added daily or as needed at the rate of 1/4 to 1/2 oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

EPA REG. NO. 9613-4

CRYSTAL-AQUA

CONCENTRATED GRANULAR CHLORINE

FIRE RESISTANT

ACTIVE INGREDIENT:
SODIUM DICHLORO-S-TRIAZINE TRIONE DIHYDRATE 100%
AVAILABLE CHLORINE 86%

Manufactured by
BISON LABORATORIES, INC., BUFFALO, N. Y. 14211

NET WT. 5 LBS.

DANGER
KEEP OUT OF REACH OF CHILDREN
SEE FIRST AID AND PRECAUTIONS ON SIDE PANEL

A shock treatment should be made every week during hot weather or after heavy rain. Shock treatments should be made during cool weather. For shock treatment, add 2 oz. of Crystal Aqua Concentrated Pool Chlorine per 1,000 gallons of pool water. Swimming should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.0 ppm to 1.5 ppm range.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm and 1.5 ppm.

DANGER: KEEP OUT OF REACH OF CHILDREN

Corrosive causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

Strong oxidizing agent. Mixture containing may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475°F with liberation of harmful gases. In case of decomposition, if possible isolate container in open area in well-ventilated area. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry clean measuring utensils. Store in a cool dry place. Keep closed when not being used. Do not reuse container. Rinse empty container thoroughly with water and drain.

FIRST AID:

In case of contact with skin, remove excess material and flush skin or eyes with good water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before reuse.

If swallowed, feed grain or cooked cereal followed by olive oil or cooking oil. Call a Physician immediately.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply the product only as specified on this label.
