**M-GARD S540 WOOD PRESERVATIVE FOR
WOOD SURFACES IN CONTACT WITH SOIL,
CONCRETE OR WATER INCLUDING
FOUNDATIONS - SILLS - DOCKS - BOATS -
FENCE POSTS**

M-GARD S540 is only intended for use on exterior wood. Do not apply to food or feed contact surfaces. Do not contaminate drinking water with treated articles.

M-GARD S540 Wood Preservative provides protection against moisture, rot and mildew on any natural wood surface. This copper naphthenate wood preservative and insecticide will preserve, protect and seal wood surfaces that will be in contact with soil, water or concrete.

The copper fungicide gives a green cast to M-GARD S540 Wood Preservative. This product is not intended for use as a stain. The green color will fade within a few months when exposed to sunlight. Oil or alkyd stains or paints can be applied over M-GARD S540 Preservative after overnight dry but the green may bleed through lighter colors. Do not over coat M-GARD S540 Wood Preservative with latex paint or clear finishes until thoroughly cured (6 to 12 months).

PREPARATION

Wood should be clean dry, well seasoned and free of bark.

APPLICATION

M-GARD S540 Wood Preservative should be applied liberally by brush, roller, spray or dipping in a container.

Dipping-wood should be dipped for 3 to 30 minutes per inch of thickness. Fence posts, poles, foundation timbers and heavy wooden members should be immersed in the product for 12 to 48 hours.

Do not thin — Materials supplied at proper application consistency.

Use one coat on materials to be finished with paint or stain.

If no finish is to be used, apply two liberal coats within the hour. Thoroughly cover ends. The more preservative absorbed by the wood, the longer and more effective the protection.

Clean painting equipment with mineral spirits for quick cleanup.

NOTE TO USER

Do not apply over painted or varnished surfaces. Do not apply over bark.

COVERAGE

100-300 square feet - Depending on porosity of wood and method of application.
