STATEMENT OF PRACTICAL TREATMENT

In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or far back on patient's tongue. Emetics such as 2 teaspoons (10 ml) of ipecac syrup, or 1 teaspoonful (5 ml) of dry mustard in warm water to form a paste, or soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, flour and water, or other nonoily demulcent. Never induce vomiting or give anything by mouth to an unconscious person.

Microbiocide for Secondary and Tertiary Oil Recovery

SECONDARY AND TERTIARY PETROLEUM RECOVERY

JET CIDE 711 is a highly effective microbiocide for use in controlling the growth of bacteria found in secondary and tertiary petroleum recovery waterflood systems.

JET CIDE 711 can be injected directly from the shipping container. It should be thoroughly mixed into the produced water, fresh or salt water or commingled water or the secondary or tertiary oil recovery waterflood systems for effective microorganism control. It may also be diluted with water for injection.

JET CIDE 711 is used at the rate of 3-4-6 fluid ounces per 100 bbl of water for growth inhibition of Bacillus cereus and Desulfotribrio desulfuricans.

DRILLING FLUIDS

JET CIDE 711 is a highly effective microbiocide for use in controlling the growth of bacteria found in water based drilling fluids. It is especially useful in fluids containing starches, Xanthanate gums, and wood sugars. The uncontrolled growth of these fungi and bacteria can cause increased corrosion, undesirable odors and degradation of the drilling mud especially fluid loss properties.

JET CIDE 711 is used at the rate of 1 to 10 gallons per 100 bbl of mud (0.02% to 0.2%). It can be used directly from the shipping container or prediluted with water. It can be put in through the mud hopper or added to the pump suction.
