

### DIRECTIONS

Begin spraying at the tail & move toward the head. Fluff the hair so that the spray will penetrate. Try to spray directly on Ticks. Make sure that animal's entire body is treated including the legs and under the body.

Spray 20 to 30 seconds for a 25 pound animal. Spray Cats 5 seconds or less for a five pound animal. Repeat treatment as necessary but do not treat more than once weekly.

Spray the animal's living quarters and bedding frequently attempting to reach directly as many spots as possible. Allow about 15 minutes of air circulation before returning animal to area.
