

CHEMSICO WASP AND HORNET KILLER IV

A long lasting residual spray with synthetic pyrethroids for quick knockdown with a spray pattern up to 20 feet which kills wasps, hornets, yellow jackets, spiders, tent caterpillars and Gypsy Moth and Caterpillars.

Active Ingredient:

Chlorpyrifos [0,0-diethyl 0-(3,5,6-trichloro-2-pyridyl) phosphorothioate]	0.2500% w/w
Xylene range aromatic solvent	0.3300%
d-trans allethrin (allyl homolog of Cinerin 1)	0.0500%
Related Compounds	0.0036%
Inert Ingredients .....	99.3664%

SHAKE WELL BEFORE USING

KEEP OUT OF REACH OF CHILDREN

Caution:

See side panel for additional precautionary statements

Net Contents: 11 oz

### Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Shake well before each use. Remove protective cap. Aim spray away from person. Push button to spray.

For Indoor Use: In non-food areas only of commercial, industrial, office, residential, public, institutional and storage buildings, homes, hotels, ship cabins and hospitals. In hospitals, patients should be removed prior to treatment. Also for use in buses, automobiles, and trucks, boxcars and ship cargo holds. Do not use on electrical equipment or on surfaces that can be harmed or stained by water. Also for use indoors in dog kennels and horse stables. In horse stables, not for application if horses will be used for food.

Indoors - to kill crawling insects: Roaches, earwigs, grain mites, sowbugs, silverfish, spiders, scorpions, and centipedes: Spray thoroughly and frequently into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, door frames, bookcases, and storage areas. **SPRAY DIRECTLY ON INSECTS** where possible. Repeat as necessary.

Outdoors - to control nuisance pests: ants: spray trails, nest and point of entry. Spray on ants where possible. Repeat as necessary.

Spiders: Direct short burst of spray on spider and repeat as necessary.

Scorpions: Direct short burst of spray on scorpion and repeat as necessary.

Wasps: Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places contacting as many insects as possible. Repeat as necessary.

To kill Tent Caterpillars: Application should be made when caterpillars are young and tents are first noticed. For best results, apply in late afternoon or evening when caterpillars have returned to their tents. Aim spray directly at tents and totally saturate on all sides. Repeat as necessary.

Gypsy Moth Caterpillars: During April and May when Gypsy Moth Caterpillars first appear, spray directly on foliage in trees and bushes where caterpillars are feeding. Avoid overspraying to the point of excessive runoff. As they migrate down trunks of the tree and rest at ground level, the Gypsy Moth Caterpillar must be sprayed directly. As the caterpillars pupate into adult moths found on tree trunks, walls and foundations, wood piles and surrounding areas, spray the caterpillars directly. Destroy egg masses wherever they are found before the young caterpillars emerge again in the Spring.

**NOTE WELL:** Do not use on azaleas, camelias, poinsettias, rosebushes or variegated ivy because of possible injury to these plants.

## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS

Avoid contact with eyes, skin and clothing. Avoid breathing vapors or spray mist. Keep away from food, feedstuffs and domestic water supplies. Wash thoroughly after handling. Do not use in edible product areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

### ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on plants. Protective information may be obtained from your Cooperative Agricultural Extension Service.

### STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. If on Skin: in case of contact, remove contaminated clothing and immediately wash skin with plenty of water. If in Eyes: Flush eyes with plenty of water.

NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

### PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F. may cause bursting.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
