**STOP. READ ENTIRE LABEL BEFORE USE.****DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Never use indoors.

**(OPTION 1 - PARAGRAPH FORM)**

**SHAKE WELL BEFORE EACH USE.** Aim spray away from person. Push button to spray. **Outdoors:** To control nuisance pests: **Ants:** Spray trails, nest and point of entry. Spray on ants where possible. Repeat as necessary. **Spiders:** Direct short burst of spray on spider and repeat as necessary. **Scorpions:** Direct short burst of spray on scorpion and repeat as necessary. **Wasps, Hornets and Yellow Jackets:** Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places contacting as many insects as possible. Repeat as necessary. To kill **Tent Caterpillars:** Application should be made when caterpillars are young and tents are first noticed. For best results, apply in late afternoon or evening when caterpillars have returned to their tents. Aim spray directly at tents and totally saturate on all sides. Repeat as necessary. **Gypsy Moth Caterpillars:** During April and May when Gypsy Moth Caterpillars first appear, spray directly on foliage in trees and bushes where caterpillars are feeding. Avoid overspraying to the point of excessive runoff. As they migrate down trunks of trees and rest at ground level, the Gypsy Moth Caterpillars must be sprayed directly. As the caterpillars pupate into adult moths found on tree trunks, walls and foundations, wood piles, and surrounding areas, spray the caterpillars directly. Destroy egg masses wherever they are found before the young caterpillars emerge again in the Spring. **NOTE WELL:** Do not use on azaleas, camellias, poinsettias, rosebushes or variegated ivy because of possible injury to these plants. \*This product is non-staining to most home siding depending on age and cleanliness. Before using in areas where the spray may contact home siding, test in an inconspicuous area and recheck in a few hours.

**(OPTION 2 - SIMPLIFIED DIRECTIONS)**

1. Apply at sunrise or sunset when insects are least active. (graphic-sunset)
2. Stand a safe distance from the nest. Don't stand directly underneath.
3. Shake can well before each use. Aim spray away from person. Push button to spray. (graphic-hand' 'r/can)  
NOTE: \*This product is non-staining to most home siding depending on age and cleanliness. Before using in areas where spray may contact home siding, test in an inconspicuous area and recheck in a few hours.
4. Spray the nest until soaked. (graphic-nest) Chemsico's powerful spray will also kill insects that return to the nest over

the next few days.

5. Wait at least 24 hours before removing

**OTHER PESTS**

**Tent Caterpillars:** Apply in the late after caterpillars have returned to their tents. S
