DEC 15 1997

Ms. Kathy Tryson
Chemsico, Div. of United Industries Corp.
P.O. Box 15842
St. Louis, MO 63114

Dear Ms. Tryson:

Subject: Amendment- additional claims
Chemsico Home Insect Control C
EPA Registration No. 9688-85
Your Submission dated July 25, 1997

This amendment referred to above, submitted in connection with registration under FIFRA section 3(c)(7)(a), is acceptable, provided that you:

1. Submit and/or cite all data or other material required for registration/reregistration of your product under FIFRA section 3(c)(5) or FIFRA section 4 when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

a. Delete the claim for appletwig borers. This pest belongs to the family Bostrichidae and would more accurately be listed as a false powderpost beetle, for which there are no permethrin registrations.

b. Add the following qualifier after references for control of termites "(For localized control only).".

c. Under optional directions for wood infesting insects either delete "including strains resistant to other insecticides" or identify the insecticides i.e. organophosphates, carbamates. Data must be available to support this claim.

d. Delete reference to "Applications may be made to inaccessible areas by drilling a hole and then spraying.". This instruction is too vague and limited to applicators.

e. Following the site wood piles add in parenthesis (Do not use on firewood).

3. Submit two (2) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

George T. LaRocca
Product Manager (13)
Insecticide-Rodenticide Branch
Registration Division (7505C)

Enclosure

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 9688-85

Home Insect Control C

- [Kills both adult and pre-adult (larval) fleas - Kills roaches
- Kills bugs fast - on contact • Kills on contact • Keeps killing
- Keeps on killing • Keeps killing for up to four weeks • Up to 4 week control • Use indoors and outdoors • Economical do-it-yourself pest control • Long lasting control • Keeps killing for weeks • Kills termites [including dry-wood termites]
- Guaranteed to kill termites • Controls [Kills] wood destroying pests including termites • For use around foundations, outside buildings, porches, wood piles, wooden fences and decks [patios] • Creates an insect barrier around your home • Water-based • Non-staining • No lingering odor
- No oily residue or film • Ready to use [no mixing]

Active Ingredient:

Permethrin [(3-phenoxyphenyl) methyl (±) cis-trans-3-(2,2-dichloroethyl)-2,2-dimethylpropanecarboxylate] 0.2%

Inert Ingredients 99.8%

*cis-trans isomer ratio: min. 95% (±) cis, max. 65% (±) trans

KEEP OUT OF REACH OF CHILDREN

CAUTION See side for additional precautionary statements

NET CONTENTS 1 GALLON

[For use in rooms, apartments, homes, attics, basements, campers, boats, household storage areas, garages, pet sleeping areas, cabins.]

STOP. READ ENTIRE LABEL BEFORE USE

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For use around the home only.

SPRAYER INSTRUCTIONS

[How to prime and care for your sprayer:]

1. After shaking product well, remove cap from container and replace with sprayer hose and cap assembly. Tighten securely.
2. Turn sprayer nozzle one half turn counter-clockwise. Hold sprayer below the level of container and prime by pumping trigger 10-20 times until product is dispensed. Adjust nozzle to fine spray or jet stream as needed.
3. To store, turn nozzle to "OFF" position and store with sprayer above level of liquid in container to prevent leakage.

SHAKE WELL BEFORE USING

PESTS INDOORS

Continues to kill and protect for up to 4 weeks with no lingering oily odor. For residual and contact control of cockroaches (waterbugs), crickets, silverfish (firebrats), clover mites, millipedes, centipedes, earwigs, sowbugs (pillbugs), spiders, brown dog ticks, lone star ticks, ants, clothes moths, carpet beetles, fleas, boxelder bugs, scorpions, spider beetles, bedbugs, grasshoppers, house flies, mosquitoes, gnats, fruit flies, cluster flies, flying moths, confused flour beetles, saw-toothed grain beetles, shiny spider beetles, grain mites, red flour beetles, angoumois grain moths, grain weevils, Indian meal moths, Mediterranean flour moths, lesser grain borers, cigarette beetles, drug store beetles, chocolate moths. Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, storage areas, doorways, window openings and wherever insects may enter the home. Spray directly on insects where possible. For Bedbugs: Apply as a spot treatment to cracks and crevices, around baseboards, floorboards, bedboards and walls. First, thoroughly clean and air mattresses and springs. Then spot treat only areas that may harbor bedbugs, concentrating on tufts, folds and seams. Allow

treated articles to thoroughly dry before use. Repeat as necessary. For persistent infestations, consult professional applicator. Grain Insects: To control [kill] confused flour beetles, saw-toothed grain beetles, spider beetles, shiny spider beetles, grain mites, red flour beetles, angoumois grain moths, grain weevils, Indian meal moths, Mediterranean flour moths, lesser grain borers, cigarette beetles, drug store beetles, chocolate moths, carpet beetles-remove infested grain, cereal or flour and destroy. Avoid contamination of other food and foodstuffs in the areas by removing before spraying. Spray directly on exposed stages and into cracks and crevices where grain insects may be hiding. In home, dispose of all infested products. The shelves and drawers should be cleaned and thoroughly sprayed so as to contact all pests, and cover with shelf paper after allowing shelves to dry. Any utensils that are contacted with spray should be washed before using. Repeat as necessary. Spiders: Spray directly on spiders and their webs. Spray all cracks and crevices which harbor spiders. Repeat as necessary. Ants: To kill ants, spray trails, nests and points of entry within buildings and homes. Spray directly on ants where possible. Repeat as necessary. Fleas, Brown Dog and Lone Star Ticks on Dogs, Cats and Premises: Spray animals along back, under forelegs and on other areas, except scrotum, face and anus. Part hair to contact skin and insure good coverage. Hold sprayer about one foot away while spraying. Apply until hair is thoroughly moist. Do not spray directly in eyes, mouth or nose of animal. To prevent reinfestation, thoroughly spray the animals' bedding and other resting areas around the home including carpets until the surface is slightly moist contacting as many insects as possible. Treat the floor area, cracks and crevices in the floor and along baseboards at the rate of 2 seconds per linear foot at a distance of 12 to 18 inches. Also spray the entire inside surface of dog houses. [Optional: To control the source of flea infestations, pots inhabiting the treated premises should be treated with a product registered for application to animals (such as Chemsico Flea & Tick Killer aerosol)]. Not recommended for use on puppies and kittens less than 4 weeks old. Do not use this product on old, sick or debilitated animals. House Flies, Mosquitoes, Cluster Flies, Gnats, Fruit Flies, Flying Moths: Close all doors and windows. Point sprayer upward. Direct spray mist to all parts of the room, especially windows and other light sources which may attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed. Car-

379

pet Beetles and Clothes Moths: To treat carpets, hold sprayer 14-18 inches from carpet. Apply spray evenly, covering the entire surface until slightly moist. Spray underside of carpet when possible. Avoid wetting or soaking. Allow treated articles to thoroughly dry before use. **NOTE: Check carpet manufacturer's warranty, care and maintenance information before using product on your specific brand of carpeting.** **To Treat Garments, Blankets, Carpets and Other Fabrics Before Storage:** Dry clean or wash before treatment and after storage. Apply spray evenly, covering the material on both sides until slightly moist. For best results, place treated materials in plastic bags after drying and store in a dark place. Also spray floor and baseboards, closets, cracks, crevices, infested areas of shelving and/or wherever these insects are seen or suspected.

OUTDOORS

Pests on Outside Surfaces of Buildings: Use this product to control (kill) ants, clover mites, crickets, earwigs, millipedes and sowbugs (pillbugs) on the outside surfaces of buildings. To help prevent infestation of buildings, treat the building foundation to a height of 2 to 3 feet, where pests are active and may find entrance. Also, apply as a residual spray to outside surfaces of buildings, including porches, screens, window frames, eaves, patios, garages, refuse dumps, and other areas where these pests congregate or have been seen. Repeat treatment as needed to maintain effectiveness. **House flies, Mosquitoes, Cluster Flies, Gnats, Flying Moths:** For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, in garages, and other places where these insects alight or congregate. Repeat as necessary. **Ants, Lone Star Ticks, Crickets, Fleas, and Earwigs:** For treatment of localized infestations of these insects in outdoor areas where there are weeds or bushy non-crop areas, spray infested areas thoroughly. For ants, thoroughly wet hills and runways. Repeat application as reinfestations occur. **To Control (Kill) Fire Ants:** Apply 1/2 gallon (64 oz.) of solution as a gently rain to each fire ant mound using a sprinkler can. Thoroughly wet the mound and surrounding area to a 4 foot diameter. For best results, apply in cool weather, 65-80°F, or in early morning or late evening hours. Treat new mounds as they appear. Do not disturb the mound prior to treatment. If possible, treat all mounds in the vicinity, and treat all colonies which may not as yet have

constructed a mound. Do not use equipment that produces a pressurized spray as pressurized sprays may disturb fire ants and cause migration, reducing product effectiveness.

OPTIONAL POWER PUMP CLAIMS, INSTRUCTIONS & STORAGE AND DISPOSAL DIRECTIONS

Revolutionary Power Pump™ - Works like a pressure sprayer! • Ready to Pump and Spray
• Refillable • Power Pump Pressure Sprayer
• Pump & Spray the Insects Away • Rest your trigger finger

Yes, this product is different! Chemsico Home Insect Control C kills bugs fast both in and around homes, and continues to protect for weeks with no lingering odor. And its revolutionary Power Pump package eliminates the need to squeeze a trigger sprayer over and over again. The Power Pump works like a pressure sprayer - just pump it a few times and spray. And the Power Pump can be refilled up to 5 times with Chemsico Lawn & Garden Insect Control concentrate for incredible value!

This product kills ants, centipedes, clover mites, cluster flies, cockroaches, crickets, earwigs, fleas, flying moths, firebrats, gnats, house flies, millipedes, mosquitoes, pillbugs, silverfish, sowbugs, spiders, ticks and waterbugs.

STOP. READ ENTIRE LABEL BEFORE USE

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. *For use around the home only.*

- 1. CONNECT WAND HOSE TO POWER PUMP BOTTLE.** Unwrap the wand. Unscrew and discard the Black Cap on the bottle. Push the Clear Tube down through the small opening on the bottle (graphic). Tightly screw the Green Hose Connector Cap onto the bottle (graphic). Make sure the Green Button on the wand is "OFF" or "UP" before pres-

surizing (graphic).

- 2. PRESSURIZE THE POWER PUMP.** Break off the Pump Handle "TAB" with your thumb (graphic). Pump 20 - 30 times to build up pressure. **NOTE:** The Power Pump bottle may bulge slightly as it is pressurized. Never pressurize by any means other than the pump included. You'll need to pump occasionally to keep the Power Pump pressurized during use.
- 3. SHAKE WELL** (graphic).
- 4. THOROUGHLY SPRAY AREAS WHERE INSECTS MAY HIDE OR ENTER THE HOME.** This includes cracks, crevices, openings around pipes and sinks, under refrigerators, baseboards, flooring*, storage areas, doorways, window openings and wherever insects may enter the home. Spray directly on insects where possible. Just press the Green Button on the wand to spray. If needed, the button can be locked "ON" by pushing it down and forward at the same time. The reverse motion will lock it "OFF" (graphic). **NOTE:** See "Use Tips" section below for directions on how to treat specific insects.
- Check manufacturer's warranty, care and maintenance information before using product on your specific brand of carpeting or flooring.

USE TIPS

- Keep ants out of your home by frequently spraying their trails and points of entry. Monthly application is usually sufficient.
- For best results in controlling (killing) fleas; treat your home and yard frequently. Focus on areas where pets spend time, especially where they sleep. In addition, treat pets regularly with a product registered for use on animals such as Chemsico Flea & Tick Killer aerosol. Do not use this product on pets.
- To reduce annoyance from mosquitoes, house flies, gnats, and flying moths, spray outside surfaces of screens, doors, window frames and around outdoor light fixtures. Apply every two weeks for best results.
- Kill ants, crickets, earwigs, millipedes and sowbugs outside before they move in. Just spray around your home's foundation to a height of 3 feet. For best results, repeat treatment monthly.

REFILLING

The Power Pump can be refilled up to 5 times with Chemsico

Lawn & Garden Insect Control concentrate. Add 10 oz. of concentrate and dilute to a gallon with water. Use "Fill to Here" mark on the side of the Power Pump bottle as a guide. Shake well to mix. Make sure the Green Pump Cap and the Green Hose Connector Cap are tightly secured before repressurizing. Make sure the Green Button on the wand is "OFF" or "UP" before pressurizing (graphic).

IMPORTANT: Do not refill more than 5 times. To keep track of the number of times refilled, put a mark through the appropriate number: (1) (2) (3) (4) (5-final). Do not use any product other than Chemsico Lawn & Garden Insect Control concentrate in this Power Pump. Incompatible chemicals may damage the pump making it unsafe to use.

OPTIONAL SIMPLIFIED DIRECTIONS AND WOOD-INFESTING INSECTS DIRECTIONS

This product kills ants, centipedes, clover mites, crickets, earwigs, fleas, flies, firebrats, gnats, millipedes, mosquitoes, moths, pillbugs, roaches, silverfish, sowbugs, spiders, ticks, waterbugs and many other common insects and many wood-infesting insects including termites [including dry wood termites].

[STOP. READ ENTIRE LABEL BEFORE USE.]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For use around the home only. Chemsico Home Insect Control C kills many insects fast. Kills roaches (including strains resistant to other insecticides) for up to 4 weeks.

HOW TO USE

SHAKE WELL BEFORE USING: Hold the container in an upright position and adjust the nozzle to give a wet spray. Spray

infested surfaces until thoroughly wet. Apply directly on insects where possible. Re-treat as needed to maintain effectiveness. Do not spray into electrical outlets or utilities. Do not permit contact with treated surfaces until spray has dried.

INDOORS

Spray areas where insects may hide or enter the home; including cracks, crevices, openings around pipes and sinks, under refrigerators, baseboards, flooring, storage areas, doorways, window openings and wherever else insects may enter the home.

NOTE: See "Use Tips" section below for directions on how to treat specific insects. [See specific directions for use of trigger sprayer on side panel or attached bag.]

USE TIPS

1. In addition to the indoor treatment, kill the *ants, crickets, earwigs, millipedes and sowbugs* outside before they move inside. Just spray around your home's foundation to a height of 3 feet, and treat ant trails. For best results, repeat treatment monthly.
2. For best results in controlling [killing] *fleas and ticks (American dog, brown dog, deer, lone star)*, treat your home and yard frequently. Focus on areas where pets spend time, especially where they sleep. In addition, treat pets regularly with a product registered for use on animals such as . . . Do not use this product on pets.
3. To reduce annoyance from *mosquitoes, flies, gnats, moths, wasps and hornets*, spray outside surfaces of screens, doors, window frames and around outdoor light fixtures. Apply every two weeks for best results.
4. For control of *carpet beetles**, spray along baseboards and edges of carpeting, under carpeting, rugs and furniture, in closets, on shelving and wherever these insects are seen.
5. For *termites** [including dry-wood termites]*, spray heavily into areas vulnerable to termite attack such as cracks, crevices, openings around pipes, along baseboards, doors, window frames and cracks in the foundation. Apply evenly, avoid dripping and runoff. One gallon will treat 100 sq. ft. This product will kill workers and winged reproductive forms of termites in the treated areas and provide temporary protection from infestation. Re-treat as needed to maintain effectiveness.

* Check manufacturer's warranty, care and maintenance information before using product on your specific brand of carpeting or flooring.

****USE OF THIS TYPE OF PRODUCT TO CONTROL [KILL] TERMITES SHOULD NOT BE CONSIDERED A SUBSTITUTE FOR SOIL TREATMENT OF SUBTERRANEAN TERMITES DONE BY A PROFESSIONAL PEST CONTROL OPERATOR.**

OUTDOORS

WOOD-INFESTING INSECTS [INCLUDING TERMITES]

*For Beetles (Furniture, Deathwatch, False powderpost, Longhorned, Powderpost, Appletwig borers), Carpenter ants (and other wood-infesting ants), Carpenter bees and Termites** [including dry wood termites]:*

Treat outside surfaces of buildings, porches, wooden decks and patios, wooden fences, window frames, doorways, foundations, eaves, patios, garages, garbage areas and other areas where you may find these pests.

Spray infested surfaces until thoroughly wet. Apply evenly on wood surfaces, using a coarse spray, avoiding dripping and runoff. One gallon will treat 100 sq. ft. Re-treat as needed to maintain effectiveness.

Spray infested areas and areas likely to be infested, such as wood surfaces, voids and channels in damaged wood, spaces between wooden parts of a structure, and between wood and foundations where infestation is likely to occur, also around fenceposts, wood piles and tree stumps. Applications may be made to inaccessible areas by drilling a hole and then spraying.

Suitable protective clothing should be worn in confined or overhead areas to prevent exposure to eyes and skin. The use of eye protection, protective head covering, chemical resistant gloves and footwear, a long-sleeved shirt and long pants or coveralls are recommended. Confined areas, such as detached garages, under porches and decks, should be ventilated during and immediately following application before the areas are re-occupied.

For carpenter ants, spray around doors and windows and other places where ants may enter or crawl and hide. Also treat cracks and crevices or openings into wall voids or other areas

6/5

where they may be present.

For carpenter bees, spray or inject into holes and tunnels already made by the bees, and spray areas where they are beginning to build tunnels into the wood.

*For Termites** [Including dry-wood termites]*, treat as for other wood-infesting insects. This product will kill workers and winged reproductive forms of termites in the treated areas and provide temporary protection from infestation. Re-treat as needed to maintain effectiveness.

OPTIONAL SEPARATE TRIGGER SPRAYER DIRECTIONS:

SPRAYER INSTRUCTIONS

[How to prime and care for your sprayer:]

1. After shaking product well, remove cap from container and replace with sprayer hose and cap assembly. Tighten securely.
2. Turn sprayer nozzle one half turn counter-clockwise. Hold sprayer below the level of container and prime by pumping trigger 10-20 times until product is dispensed. Adjust nozzle to fine spray or jet stream as needed.
3. To store, turn nozzle to "OFF" position and store with sprayer above level of liquid in container to prevent leakage. [Hook the trigger on or under the bottle handle so that trigger is above the level of contents.]

OPTIONAL CLAIMS AND DIRECTIONS FOR A TERMITE PRODUCT

[Guaranteed to kill termites or your money back • Keeps killing for weeks! • Kills termites [including dry-wood termites] • For use around foundations, outside buildings, porches, wood piles, wooden fences and decks • Creates an insect barrier around your home]

[OPTIONAL MARKETING LANGUAGE]

Signs of Termites

- ✓ "Swarming" or flying termites in the house, especially near sources of light
- ✓ Small wings or sawdust near windows, doors or in the garage
- ✓ Mud tunnels along the foundation of the house, inside or outside
- ✓ Small holes in the wood or buckling paint

Reducing the risk of Termites

There are some steps you can take to reduce the risk of getting termites.

- ✓ *Eliminate any sources of moisture for termites.* Check for leaky indoor pipes, outdoor water spigots, sump pumps or sprinklers. Look for any areas that stay moist for a long time, such as mulch or under bricks or large rocks and ensure that water flows away from your home. Also check for interior leaks in pipes or from roof drainage. Pay particular attention to areas near kitchens or bathrooms, and attached porches or decks.
- ✓ *Remove potential food sources that will attract termites near your home.* These include direct wood-to-soil contact (fences, stairs, trellises), wood piles, stumps or dead bushes and other wood debris. Wood should be separated from the soil by at least 18 inches.

[STOP. READ ENTIRE LABEL BEFORE USE.]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. *For use around the home only.*

HOW TO USE

SHAKE WELL BEFORE USING. Hold the container in an upright position and adjust the nozzle to give a coarse, wet spray. Spray infested surfaces until thoroughly wet. 4. **THOROUGHLY SPRAY AREAS WHERE TERMITES MAY HIDE OR ENTER THE HOME.** Spray infested surfaces until wet. Apply evenly on wood surfaces, avoid dripping and runoff. Just press the Green Button on the wand to spray. If needed, the button can be locked "ON" by pushing it down and forward at the same time. The reverse motion will lock it "OFF" (graphic).

One gallon will treat 100 sq. ft. This product will kill workers and winged reproductive forms of termites in the treated areas and provide temporary protection from infestation. Re-treat as needed to maintain effectiveness. Do not spray into electrical outlets or utilities. Do not permit contact with treated surfaces until spray has dried.

INDOORS

Spray heavily into areas vulnerable to termite attack such as cracks, crevices, openings around pipes, along baseboards, doors, window frames and cracks in the foundation. Also spray in termite eaten channels or damaged wooden areas. Spray directly on insects where possible. Applications may be made to inaccessible areas by drilling a hole and then injecting the spray.

OUTDOORS

Treat outside surfaces of buildings, porches, wooden decks and patios, wooden fences, window frames, doorways, foundations, eaves, patios, garages, garbage areas and other areas where you may find termites.

Spray infested areas and areas likely to be infested, such as wood surfaces, voids and channels in damaged wood, spaces between wooden parts of a structure, and between wood and foundations where infestation is likely to occur, also around fenceposts, wood piles and tree stumps. Applications may be

6/8

made to inaccessible areas by drilling a hole and then injecting the spray.

Suitable protective clothing should be worn in confined or overhead areas to prevent exposure to eyes and skin. The use of eye protection, protective head covering, chemical resistant gloves and footwear, a long-sleeved shirt and long pants or coveralls are recommended. Confined areas, such as detached garages, under porches and decks, should be ventilated during and immediately following application before the areas are re-occupied.

USE OF THIS TYPE OF PRODUCT TO CONTROL [KILL] TERMITES SHOULD NOT BE CONSIDERED A SUBSTITUTE FOR SOIL TREATMENT OF SUBTERRANEAN TERMITES DONE BY A PROFESSIONAL PEST CONTROL OPERATOR.

REFILLING

The Power Pump can be refilled up to 5 times with Chemsico® Lawn & Garden Insect Control concentrate. Add 10 oz. of concentrate and dilute to a gallon with water. Use "Fill to Here" mark on the side of the Power Pump bottle as a guide. Shake well to mix. Make sure the Green Pump Cap and the Green Hose Connector Cap are tightly secured before repressurizing. Make sure the Green Button on the wand is "OFF" or "UP" before repressurizing (graphic).

IMPORTANT: Do not refill more than 5 times. To keep track of the number of times refilled, put a mark through the appropriate number: (1) (2) (3) (4) (5-final). Do not use any product other than Chemsico® Lawn & Garden Insect Control concentrate in this Power Pump. Incompatible chemicals may damage the pump making it unsafe to use.

STORAGE AND DISPOSAL

(FOR HAND HELD TRIGGER SPRAYER PRODUCTS)

Store in cool, dry area away from heat or open flame. Discard container in trash.

STORAGE AND DISPOSAL

(FOR POWER PUMP PRODUCTS)

Store in a cool, dry area away from heat or open flame. Always release pressure by unscrewing the pump cap before storing. After 5 refills, rinse thoroughly, wrap in several layers of newspaper and discard container in trash.

PRECAUTIONARY STATEMENTS

(FOR BOTH HAND HELD TRIGGER SPRAYER AND POWER PUMP PRODUCTS)

Hazards to Humans and Domestic Animals

CAUTION: May be harmful if swallowed. Avoid contact with eyes, skin or clothing. Avoid breathing vapors or spray mist. Wash thoroughly after handling. Avoid contamination of food, feedstuffs and domestic water supplies.

Environmental Hazards

This product is extremely toxic to fish. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label. Cover aquariums and terrariums before spraying.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
