Chemisico Insect Spray kills insects that invade your valuable garden or orchard. It can be sprayed on most crops up to and including the day you harvest. And although Chemisico Insect Spray formula kills most harmful insects, it is relatively non-toxic to Honey Bees. Use Chemisico Insect Spray formula throughout the growing season as part of a complete garden care program. One quart of this formula will treat at least 5,000 square feet of growing crops. Actual, treated area/quart will vary depending upon height and thickness of treated plants.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. *For home use only.*

1. Connect a garden hose to the spray ready nozzle. (graphic)
2. Make sure the yellow water control dial on the nozzle is in the "OFF" position. (graphic)
3. Turn on water at faucet. Extend hose to the farthest area to be treated and work back towards faucet.
4. Push in the small white product control button to the "OPEN" position. (graphic)
5. To BEGIN spraying, point nozzle toward vegetables or fruit trees and turn the yellow water control dial to the "ON" position. Water will automatically mix with the product. (graphic)
6. Spray vegetables or fruit trees until wet to control insects listed below.
7. To STOP spraying turn yellow water control dial to the "OFF" position. Push small white product control button back to "CLOSED" position. Turn off water at faucet. To relieve pressure, turn yellow water control dial to "ON" position and wait until water stops spraying before removing nozzle from hose.
