[OPTIONAL MARKETING LANGUAGE]

[Chemsico Roach Control System CS contains a unique attractant that gets roaches to the bait faster, so they die faster. It also contains a dual active ingredient system. The first active kills roaches that enter the station and eat or come in contact with the bait. The second active is carried back to the nest, where it will kill roaches you do not see.

1. Attractant quickly draws roaches to bait station.
2. Roaches eat bait, then return to where they breed, carrying the active ingredients with them.
3. Roaches, [and the eggs they carry] [and their eggs], die quickly, whether or not they ate from the bait station.]

[The bait quickly draws roaches. Roaches eat the bait and return to [where they breed] [the nest]. The roaches and the eggs they carry die leaving a killing residual for the remaining roaches to consume.] [Chemsico Roach Control works by attracting roaches to the bait tray. They eat the bait and crawl away to die.] [Guaranteed to work or your money back.]
