DIRECTIONS FOR USE

This product is a highly refined miscible oil for winter control of certain insects. Apply in dormant period before buds open – late winter or early spring. Do not apply when spray will freeze to limbs as injury may result from the excess deposit. Remove all loose bark prior to spraying. Scales may be protected by these "shingles". Spray to wet all twigs, limbs, and the trunk. Measure dosage to be used carefully. Add to water, and mix thoroughly. Do not use mixture after standing without stirring.
