TIPS TO REDUCE THE RISK OF TERMITES[†]

In addition to using this product to spot treat for termites., there are some important steps you can take to reduce the risk of getting termites:

- ✓ Eliminate sources of moisture for termites (any areas that remain moist inside and outside the home)
- ✓ Remove food sources (any direct wood to ground contact, including branches for trees and shrubs)
- ✓ Apply a pre-treatment when building a new home
- ✓ Have a regular termite inspection

[†]This [product] [treatment] will kill workers and/or winged reproductive forms of termites present at the time of application only. For active, structural infestations by subterranean termites this product can only be used to supplement application of a federally registered stand-alone termiticide. Application of this product will not provide structural protection, nor substitute for mechanical alteration, soil or foundation treatment with termiticide. This product is not to be used as sole protection against termites, as it will neither eliminate termite infestations nor provide protection against future infestations.
