### MEASUREMENT CONVERSIONS

1 Tablespoon = 3 teaspoons, 1 fl. oz. = 6 teaspoons or 2 Tablespoons  
6 fl. oz. = 3/4 cup

Under the Federal Insecticide, Fungicide, and Rodenticide Act, registered under EPA Reg. No.

9688-204

1 ½ Tablespoons in 3 gallons of water = 1½ teaspoons in 1 gallon of water  
 2 Tablespoons in 3 gallons of water = 2 teaspoons in 1 gallon of water

†NOTE: This product is non-staining to most home siding depending on age and cleanliness. However, before using in areas where the spray may contact home siding (vinyl siding in particular), test in an inconspicuous area and recheck in a few hours. Do not use if any staining is observed.

## LAWNS

**SURFACE INSECTS** including ants, armyworms, cockroaches, crickets, cutworms, earwigs, fleas, grasshoppers, lawn moths (sod webworms), millipedes, mites, mosquitoes, palmetto bugs, sowbugs, spittlebugs, deer ticks (which may transmit Lyme Disease) and waterbugs. Thoroughly wet down grass a few hours before applying. Mix 1½ fl oz (3 Tablespoons) in 1 gallon of water to cover [treat] 250 sq ft or 6 fl oz (12 Tablespoons) in 4 gallons of water to cover [treat] 1000 sq.ft. of lawn. Delay additional watering or mowing for 24 hours after application for optimum control of surface insects. [1 quart of Chemsico Insecticide Concentrate T treats 5,000 sq ft.]

## [NUSIANCE] PESTS OUTSIDE THE HOME

**[HOME BARRIER TREATMENT]** Mix 0.75 fl.oz. (1½ Tablespoons) in 1 gallon of water and apply as a continuous band of insecticide around building foundation and around windows, doors, eaves, vents and other areas to greatly reduce the potential for entry by crawling pests. For easier application, remove debris and leaf litter from next to the foundation, cut back vegetation and branches that touch the foundation, and move or rake back rocks, deep mulch, or other potential pest harborage next to the foundation. Apply a 3 ft band around the structure and upwards along the foundation to 3 feet and around windows, doors, and roof overhangs. Apply as a coarse spray to thoroughly and uniformly wet the foundation and/or band area so that the insecticide will reach the soil or thatch level where pests may be active. 1 gallon will treat 100 sq ft of surface area.

**OUTDOOR SURFACES USE:** For control of ants, centipedes, cockroaches, crickets, fleas, millipedes, scorpions, sowbugs, pillbugs, spiders, and deer ticks. Mix 0.75 fl oz (1½ Tablespoons) in one gallon of water and apply to ornamental plants next to foundations of buildings and to outside surfaces of buildings, porches, screens, window frames, eaves, patios, garages and other similar areas where these pests are active.
