### [Optional Marketing Paragraphs]

[Pursell 3 Deep M&B Granular][This product] was developed after several years of research and development. It is a natural, premium quality mulch that, when used as directed, provides increased weed control vs. ordinary mulches. It contains an herbicide for weed control for up to 4 months. This product protects plants from extreme temperatures and also helps retain soil moisture.

This mulch is made with either pine bark or cypress bark, natural by-products of the timber industry. These materials are ideal for mulches because they naturally degrade over time, turning into valuable organic matter.

This mulch contains only natural forest products and contains no recycled waste wood.]
