ROACH CONTROL**Spot Treatment [Optional graphic showing bait placement]**

To apply gel remove cap from tip of applicator tube. [Place plunger into rear of tube]. [Insert into gel gun]. Place tip at spot where gel is to be applied and [depress plunger] [pull trigger]. Apply gel in a ¼ inch diameter spot. Apply 1 spot for every 10 sq ft of treated area. The bait will stick to surfaces that are not greasy or dusty. [For best results,] Do not apply bait to areas recently treated with an insecticide or treat areas with an insecticide where gel has been applied, as this will act as a repellent to the roaches and will reduce the effectiveness of the gel bait. Apply behind and under the following: stove, refrigerators, dishwashers, sinks, shelving in the corners of cupboards, cabinets and closets and in other areas where roaches have been observed. Inspect placements after one month and reapply if gel placements are no longer visible. The gel will remain attractive to roaches and keep killing for up to [three] [3] months. Replace cap on gel tip when finished dispensing gel. Use a paper towel to remove unwanted bait placements and them discard in trash.

Cracks and Crevices [Optional graphic showing bait placement]

Chemsico Roach Control 5DG [This product] can be applied as spots or as a line along cracks and crevices. Place the applicator tip directly into cracks and crevices and place gel in small spots or in a continuous bead. Bait should be in the void area and not on open or exposed surfaces.
