Attention: Mr. Eric D. Smith

Subject Chemsico Disposable Bait Station
EPA Reg. No. 9688-285
Your application of March 9, 2011

Purpose The purpose of this submission is to revise your label to change from a Tier 4 to Tier 3 bait station and to change the signal word, from "WARNING" to "CAUTION", under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Label We have reviewed your two label requests, based on the data and information provided, and found them to be acceptable.

The labeling submitted with the above letter, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is acceptable, provided you submit one (1) copy of final printed labeling before you release the product for shipment.

Existing Stocks Stocks of product with existing labeling may be used for eighteen (18) months.

Consequence for non-compliance If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Questions

If you have questions about this letter, please contact Dan Peacock at 703-305-5407 (by phone) or peacock.dan@epa.gov (by E-Mail).

Sincerely yours,

John Hebert

Chemsico Disposable Bait Station

THIS BAIT STATION IS RESISTANT TO TAMPERING BY CHILDREN. Use Indoors Only.

Mouse Poison Bait Station
Contains Bitrex

ACCEPTED AUG 4 2011

For Use in Homes and Residential Buildings
Indoor Rodent Control
Kills House Mice

**Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended, for the
pesticide registered under:**

Moisture Resistant Bait

EPA Reg. No: **9688-285**

House Mice usually consume a lethal dose in a single night's feeding, but it may take two or more days from the time of bait consumption for these rodents to die. House mice cease feeding after consuming a toxic dose. This product is effective against anti-coagulant-resistant house mice.

MOUSE BAIT TRAY & LID ASSY.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves. Wash hands thoroughly immediately after such activities.

FIRST AID

Have product container or label with you when calling a poison control center or doctor for treatment. You may also contact the Hotline Number at 1-800-XXX-XXXX for health concerns, emergency medical treatment information or pesticide incidents.

- If Swallowed**
- Call a poison control center, doctor, or HOT LINE NUMBER 1-800-XXX-XXXX immediately for treatment advice.
 - Have person sip a glass of water if able to swallow.
 - Do not induce vomiting unless told to do so by a poison control center or doctor.
 - Do not give anything by mouth to an unconscious person.

- If in Eyes**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present after the first 5 minutes, then continue rinsing eye.
 - Call a poison control center or doctor for treatment advice.

- If On Skin or Clothing**
- Take off contaminated clothing.
 - Rinse skin immediately with plenty of water for 15-20 minutes.
 - Call a poison control center, doctor, or HOT LINE NUMBER 1-800-XXX-XXXX immediately for treatment advice.

TREATMENT FOR PET POISONING

If an animal eats this bait, call a veterinarian at once.

NOTE TO PHYSICIAN or VETERINARIAN

Contains the nerve poison bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Dogs and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait.

SIDE/BACK PANEL

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use this product only for sites, pests, and application methods described on this label.

To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Dispose of product container and unused, spoiled and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used to control house mice inside of homes and residential buildings. This bait station may be used in indoor areas accessible to children, consistent with all use restrictions and other requirements indicated in this label. **DO NOT USE THIS PRODUCT OUTDOORS OR IN AREAS ACCESSIBLE TO PETS.** Do not place this ready-to-use bait station in any area where there is a possibility of contaminating food or surfaces that come into contact with food. Do not place near or inside ventilation duct openings. Do not break station open and/or deliberately remove bait from it.

SELECTION OF TREATMENT AREAS: Determine areas where house mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Remove as much alternative food accessible to rodents as possible.

APPLICATION DIRECTIONS: The active ingredient in this product is different from anticoagulant rodenticides. Individual house mice cease feeding after consuming a toxic dose.

House Mice: Place a single unit at each placement location. Space placements at 8 to 12 foot intervals. Replace bait if contents are consumed or contaminated and replace units if severely damaged. If units are untouched after three days, move to new locations consistent with label text. Continue baiting until all signs of house mouse activity have ceased.

Follow-up: Wearing waterproof gloves, collect and dispose of all dead, exposed animals and leftover bait properly. To prevent reinfestation, limit sources of food, water, and harborage for house mice as much as possible. If reinfestation does occur, repeat treatment.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container in a dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place any unused product down any indoor or outdoor drain.
