STOP—READ THIS LABEL BEFORE USE

WARNING: May be harmful if swallowed or absorbed through the skin. Do not get in eyes or on skin. This material is cumulative. Repeated contact with the skin may increase hazard of handling. Wear cotton or natural rubber gloves while handling. If cotton gloves are used, they must be laundered or discarded after each day's use. Always wash thoroughly with soap and hot water before reuse.

Do not store or use in an area where there is possibility of children or animals gaining access to the material or to the carcasses of animals poisoned by the bait.

If poisoning occurs, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression. If swallowed, induce vomiting by giving a tablespoonful of salt in a glass of warm water. Administer milk or water freely and again induce vomiting until vomit fluid is clear. If eyes are contaminated, wash with flowing water for at least 15 minutes.

FISH AND WILDLIFE CAUTION: This product is toxic to fish and wildlife. Keep out of any body of water. Treated bait exposed to soil surface will be hazardous to birds and other wildlife. Apply this product only as specified on this label.

ANTIDOTE: Although atropine may be less effective as an antidote with this than with some other organic phosphorus compounds, it should be used in large therapeutic doses in cases of acute poisoning. Repeat as necessary to the point of tolerance.

RESTRICTIONS: For use only by personnel experienced in pocket gopher control. Consult your local, county, or state rodent control experts for advice on how to best use this product safely and efficiently. Apply only in burrows. Do not use above ground surface. Control of other rodent species is not recommended, since evaluations have not yet been completed.

DIRECTIONS FOR USE: This is the WAY Grain Bait for Pocket Gophers is very effective for the control of the valley (*Thomomys bottae*) pocket gopher. Bait preparations are readily accepted and death usually occurs within 24 to 48 hours after the bait is eaten. The mountain (*Thomomys talpoides*) and plains (*Geomys bursarius*) gophers are also controlled by this concentration. **HOW TO APPLY:** Place in artificial burrows made with suitable burrow building equipment. Use 1½ lbs. of This is the WAY Grain Bait for Pocket Gophers per acre in burrows spaced at 20 foot intervals or 1 lb. per acre in burrows spaced at 30 foot intervals. Treatment may also be made to natural burrows at the rate of 1½ lbs. of This is the WAY Grain Bait for Pocket Gophers per acre of area to be treated.

DO NOT REUSE THIS CONTAINER — Completely empty the contents and bury the unused chemical at least 18 inches deep in an isolated location away from water supplies.

Burn the empty container completely. Exercise extreme caution and stay well away from the smoke. Do not use the container in any connection with feed, food, or drinking water.
