

<sup>is</sup>  
ELIMINATES sluggish and plugged sewers when this condition caused by roots in sewers.

Safe with Septic Tanks — Won't Harm Trees or Shrubs

---

### DIRECTIONS

1. Pour one fourth of this package (about 1/2 lb.) into toilet and flush down. For best results use at night before retiring, when water flow is lowest. Repeat this 3 or 4 times in just a few days.
2. Repeat the treatment outlined in Step No. 1 every six months.
3. Works slowly. Kills roots so they wash away.
4. Root Eliminator is not designed for badly-neglected sewers damaged by big, thick roots. Have your plumber open and repair the sewer the first time, then use Root Eliminator regularly to attack roots when they are in the small, hair-like stage, to prevent them from ever getting out of hand again.

---

ACTIVE INGREDIENT (Copper Sulfate Pentahydrate) .....	99 %
INERT INGREDIENT .....	1 %
Copper, expressed as metallic .....	25.2 %

### CAUTION! HARMFUL IF SWALLOWED

KEEP OUT OF REACH OF CHILDREN

See front of package for antidote — Call physician.  
Do not re-use empty box or plastic bag. Discard in a safe place.

---

MONEY-BACK GUARANTEE

Return empty box for refund if not satisfied.
