

ALGAE
 CONTROL

DIRECTIONS FOR USE

Initial Dose: 1 gallon Greer Algacide to 20,000 gallons of water.

Maintenance Dose: 1 quart Greer Algacide to 50,000 gallons of water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 7-8 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 1% per week of pool capacity, add 1 quart of Greer Algacide for each 1% of volume of fresh make-up water added per week.

When swimming season is over, add 1 gallon of Greer Algacide to 10,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the cleaning of the pool before it is returned to use the following season.

When Greer Algacide is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium imitatum* (blue algae), *Phormidium retzii* (Square Disk), *Lyngbya versicolor* (blue green), and other swimming pool algae.

DANGER

Keep Out of Reach of Children. See other precautionary and First Aid statements on right panel.

Greer Algacide is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners, or premixed with other water-treating chemicals. Greer Algacide works best when added by itself directly to pool water. Greer Algacide at use dilution is non-corrosive to inanimate surfaces.

DANGER

Keep Out of Reach of Children. Corrosive, causes severe eye and skin damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water.

Rinse empty container thoroughly with water and discard.
