FLY-SWAT®

COMPLETE
MINERAL - SALT SUPPLEMENT
BLOCK

MEDICATED

PREVENTS the breeding of horn flies and face flies in the manure of

WED. CATTLE

PREVENTS the breeding of horn flies and face flies in the manure of treated cattle, when used as directed. Aids in the prevention of stomach worms (*Haemonchus*), hook worms (*Bunostomum*) and nodular worms (*Oesophagostomum*). Aids in the prevention of soft tissue (lumpy jaw) and foot rot in cattle.

PESTICIDALLY ACTIVE DRUG INGREDIENT:

Phenothiazine 2.00%

INERT INGREDIENTS 98.00%

OTHER ACTIVE DRUG INGREDIENT:

Ethylene diamine dihydriodide 0.055%

CAUTION: KEEP OUT OF REACH OF CHILDREN. Occasional sensitivity to phenothiazine has been reported in cattle. Do not feed to lactating dairy cows or goats. Feed to ruminants only.

TOTAL SUGARS (as inverts)	_____	10.0%

VITAMIN A _____ 40,000 U. S. P. UNITS PER LB.

VITAMIN D _____ 20,000 U. S. P. UNITS PER LB.

INGREDIENTS: Soybean oil meal, soybean mill feed, cane molasses, dicalcium phosphate, low flourine rock phosphate, salt, limestone steamed bone meal, calcium iodate, magnesium oxide, zinc oxide, manganese oxide, iron carbonate, cobalt carbonate, copper carbonate, vitamin A palmitate, irradiated yeast, anise oil, corn gluten feed, wheat middlings.

FEEDING DIRECTIONS: Self feed as sole source of salt at the rate of 4 oz. Fly-Swat per head per day. Place blocks at the rate of (1) one block for each 20 head of cattle or (1) one block for each 50 head of sheep or goats. Be sure an ample supply of blocks are located near animals water or loafing area. Since face flies migrate from farm to farm it is essential that a larvicide program be carried out on an area basis to assist in reduction of the adult face fly population.

Fly control will be effective only if a continuous supply is available.

Do not feed any other salt or mineral. Fly-Swat Block contains all the additional salt and mineral required by the cattle when consumed at the proper rate.
