155  
A COMBINATION PLANT FOOD AND  
CRABGRASS KILLER

Do not apply with hose and applicators. Dilute at the rate of one gallon of concentrate to 90 gallons of water and apply to 1,000 sq. ft.

**DICHONDRA AND GRASS LAWNS**

Apply Sungro Crabgrass Killer to lawns, dichondra or for the control of crabgrass and other annual grasses such as foxtail, witch grass and barnyard grass, Johnson grass, Dallis grass and goose grass. Avoid treating during hot weather (above 90 degrees F.).

Repeat at seven day intervals for one month. Fertilizer content will feed desirable grasses, while crabgrass turns brown and dies. If new crabgrass appears due to old seed germination, repeat application. This product will not permanently injure desirable grasses or dichondra. Newly seeded lawns should not be treated until well established. Don't use on St. Augustine grass.

**NOTICE:** Use of this material in a manner, or at any time other than in accordance with the directions may produce plant injury, excessive residue, or other undesirable results. Sungro Chemicals, Inc. makes no express or implied warranties other than specified on the label.
