

WEED-GO

NON-SELECT WEED AND GRASS KILLER

NON-SELECTIVE FOR USE ON NON-CROP AREAS SUCH AS RIGHTS OF WAY - INDUSTRIAL SITES - FENCE ROWS - STORAGE AREAS - PARKING LOTS.

WEED-GO is a non-selective herbicide with a fast acting double killing action. It kills by contact and by root absorption. It is recommended for killing existing weeds and grasses, and to prevent regrowth on walks, patios, driveways, black top and graveled areas, and playgrounds, and for creating firebreaks around structures in potential fire areas.

The following are a few common weeds and other vegetation that can be destroyed and regrowth prevented with WEED-GO: oxalis, crabgrass, bermuda grass, rye, oats, barley, foxtail, dog fennel, plantain, spotted spurge, pigweed, puncture vine, mustard, watergrass, green ground mold, malva, wild turnip, lambquarters, and such hard to kill perennial weeds as hoary cress, dandelion and wild morning glory, also woody plants such as poison oak, honeysuckle and blackberry.

Do not allow contact with desirable plants or lawn areas. Do not apply to areas underlaid by roots of desirable trees and shrubs. Do not contaminate water used for irrigation or domestic purposes.

This product is toxic to fish and wildlife. Birds and other wildlife in treated areas may be harmed. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforation or crushing and burying in a safe place.

WARNING ---FLAMMABLE!
KEEP AWAY FROM HEAT OR OPEN FLAME!

Active ingredients:	By Weight
2-Methoxy-4, 6-bis (isopropylamino)-s-triazine*	3.00%
Pentachlorophenol	2.20%
Other chlorophenols and related compounds	0.30%
Petroleum hydrocarbon	88.50%
Inert ingredients	6.00%
Total	100.00%

*Pramitol

CAUTION KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin. Rapidly absorbed through skin. May be harmful if swallowed or absorbed through skin.

Seller guarantees that this material conforms to the chemical description on the label, and is effective for the purposes claimed when used in accordance with label instructions. The buyer assumes all risk and responsibility for use and/or handling of this product when such use and/or handling is not in accordance with label instructions. No other warranty expressed or implied is authorized by the seller.

DIRECTIONS

Observe all warnings and cautions in handling of this material. Read the label thoroughly before using.

MIXING AND USING AS A SPRAY: Measure the required amount of WEED-GO directly into the sprayer or sprinkling can and then add the needed quantity of water and stir thoroughly. The mixed spray tends to separation standing and therefore should be gently agitated from time to time while it is being applied. Use 1 gallon of WEED-GO to 8 gallons of water and apply to 1000 sq. ft. for the control of heavy brush, deep rooted perennials, woody plants and tall weeds. For the existing annual weeds and grasses, use 1 gallon of WEED-GO to 12 gallons of water and apply to 1500 sq. ft. The root action on deeprooted perennials and some woody plants requires applied moisture or rain to get the active ingredients to the root zone.

Two days after applying WEED-GO, water the treated area deeply to increase plant absorption. One day treatment normally provides control for a full season. Repeat application if necessary. For longer lasting control double the rate of application.

SPOT TREATMENT: For woody plants such as poison oak, honeysuckle, blackberry and bermuda grass on driveways, patios and parking lots apply at the rate of 1 gallon of WEED-GO mixed with 8 gallons of water. Spray all exposed parts and saturate the soil around the base. Follow with deep watering. Use a tank sprayer or sprinkling can.
