

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

CAUTION

Causes eye and skin irritation. Do not get in eyes, on skin or clothing. Harmful if swallowed. Do not breathe vapor or spray mist. Use waterproof gloves and face shield or goggles when handling concentrate. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT

In case of eye contact, wash with water for at least 15 minutes and get medical attention.

In case of skin contact, wash immediately with plenty of soap and water. Get medical attention, if skin irritation persists.

If swallowed, Call a physician or Poison Control Center. DO NOT INDUCE VOMITING. Vomiting may cause aspiration pneumonia. Drink 1/2 to four glasses of milk or water.

If inhaled, remove victim to fresh air.

NOTE TO PHYSICIAN: Caution - PRODUCT CONTAINS A PETROLEUM DISTILLATE. There is no specific antidote. If lagested vomiting may result in aspiration pneumonia. Gastric lavage followed by administration of activated charcoal and a cathartic may be indicated.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Birds and wildlife in treated areas may be killed. Do not apply directly to any body of water. Do not apply where runoff is likely to occur. Do not contaminate water used for irrigation or domestic purposes. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water used for irrigation or domestic purposes. Do not contaminate water by cleaning of equipment.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

STORAGE AND DISPOSAL

STORAGE: Store in a cool dry place. Keep container closed. **PESTICIDE DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

WEED-GO is a non-selective herbicide with a fast acting, double-killing action. It kills by contact and by root absorption. It is recommended for killing existing weeds and grasses, and to prevent regrowth on walks, patios, driveways, black top and gravelled areas, and playgrounds, and for creating firebreaks around structures in potential fire areas.

The following are a few of the common weeds and other vegetation that can be controlled or killed and regrowth prevented with WEED-GO: oxalis, crabgrass, bermuda grass, ryegrass, barley, foxtail, dog fennel, plantain, spotted spurge, pigweed, puncture vine, mustard, watergrass, green ground mold, malva, wild turnip, lambsquarters, and such hard to kill perennial weeds as hoary cream, dandelion and wild morning glory, also woody plants such as poison oak, honeysuckle and blackberry.

MIXING AND USING AS A SPRAY: Measure the required amount of WEED-GO directly into the sprayer or sprinkling can and then add the needed quantity of water and stir thoroughly. The mixed spray tends to separate on standing and therefore should be gently agitated from time to time while it is being applied. Use 1 gallon of WEED-GO to 8 gallons of water and apply to 1000 sq.ft. for the control of heavy brush, deep rooted perennials, woody plants and tall weeds. For the existing annual weeds and grasses, use 1 gallon of WEED-GO to 12 gallons of water and apply to 1500 sq.ft. The root action on deeprooted perennials and some woody plants requires applied moisture or rain to get the active ingredients to the root zone.

Two days after applying WEED-GO, water the treated area deeply to increase plant absorption. One day treatment normally provides control for a full season. Repeat application if necessary. For longer lasting control double the rate of application.

SPOT TREATMENT: For woody plants such as poison oak, honeysuckle, blackberry, and bermuda grass on driveways, patios and parking lots apply at the rate of 1 gallon of WEED-GO mixed with 8 gallons of water. Spray all exposed parts and saturate the soil around the base. Follow with deep watering. Use a tank sprayer or sprinkling can.
