PRODUCT INFORMATION

RIVERSIDE GRO BEAN is especially formulated for planter box treatment of
soybean seed to control seed and soil borne diseases, including damping
off, seed decay organisms and seedling blights and to provide essential
Molybdenum for plant growth where soils have been found to be deficient
in available Molybdenum. Molybdenum helps the nodule bacteria and plants
make more efficient use of nitrogen. It is prepared for use directly in
the planter box, thereby eliminating seed handling to have seed treated.

A non oil lubricant has also been added to help prevent cracking and
splitting of the seed so they will flow easily and evenly from the planter
box.

This material provides adequate coverage of seed and any excess flows with
the seed into the furrow, giving additional protection against soil-borne
diseases.

DO NOT USE TREATED SEED FOR FOOD, FEED OR OIL PURPOSES.

RECOMMENDATIONS

Use GRO BEAN as a planter box treatment at the rate of 4 ounces per bushel
of seed. Plant soybeans at the rate of at least one bushel per acre, or the
amount of Molybdenum applied to each acre will not be adequate.

PLANTER BOX RATES ARE AS FOLLOWS

<u>Size of Planter Box</u>	<u>Number of 1-oz. Scoops per Planter Box</u>
1/2 Bushel	2 Heaping Scoops
1 Bushel	4 Heaping Scoops

MEASURING CUP ENCLOSED

Plant at the rate of at least one bushel soybeans per acre.
