KILL-A-PLenty 162

KILL-A-Plenty 162 is an emulsifiable concentrate specifically formulated for use on cotton for control of most major insect pests such as the boll weevil, tobacco, cotton leafworm, thrips, cotton fleahopper, red spider mite, tarnished plant bug, aphids, salt marsh caterpillar, cutworms, brown cotton leafworms, and certain species of spider mites. Kill-A-Plenty 162 can be applied with conventional low-volume, low-pressure sprayers, or by airplane.

GENERAL DIRECTIONS

When preparing a spray solution using Kill-A-Plenty 162 first, half fill tank with part of the desired amount of water. Then add the desired amount of Kill-A-Plenty 162 to the tank with agitation (mechanical or overflow) in operation. Finish filling with water using agitation.

APPLICATION: Airplane - Use ½ gallon of Endrin-Methyl Parathion 162 in 3 – 10 gallons of water per acre consistent with crop growth and good coverage. Ground - Use 1 gallon of Endrin-Methyl Parathion 162 in 7 – 15 gallons of water per acre consistent with crop growth and good coverage.

DIRECTIONS FOR USE ON COTTON

FOR THRIPS AND COTTON FLEAHOOPERS, apply ½ pint to 1 pint per acre. For thrips, begin application at two leaf stage and repeat every 7 days until insects are under control.

FOR COTTON FLEAHOOPERS, begin application when insects appear and repeat every 5 to 7 days until insects are under control.

FOR BOLL WEEVIL, 1 sprays, rapid plant bug, tarnished plant bug, cotton leafworm, cabbage looper, salt marsh caterpillar, cutworms, aphids, and certain species of spider mites, apply 1 to 2 pints per acre, depending on rankness of foliage and degree of infestation. Repeat every 3 days until insects are under control. For extremely heavy infestations of boll weevil and bollworm late in season, it may be necessary to reduce interval of application to 2 days.

Uniform coverage is necessary for best results. Make no application within 15 days of hand picking harvest.

POISON

ANTIDOTE

Kill-A-Plenty

ENDRIN - Methyl Parathion 162

(CONTAINS 1.6 LBS. ENDRIN AND 2 LBS. METHYL PARATHION PER GALLON)

KILLS MAJOR INSECT PESTS - KILLS QUICKLY - GOOD RESIDUAL CONTROL - CONTROLS RESISTANT BOLL WEEVIL

ACTIVE INGREDIENTS: By Weight

Endrin (Hexachloroepoxyoctahydro-endo, endo-dimethoxynaphthalene) 17.10%
O, O-Dimethyl O-p-nitrophenyl thiophosphate* 21.50%
Aromatic Petroleum Solvent 55.00%

INERT INGREDIENTS: 6.40%

TOTAL 100.00%

*Methyl Parathion

DANGER!

POISON

KEEP OUT OF REACH OF CHILDREN

See antidote statement and other warnings on the back/side panel. Do not give dairy animals or animals being finished for slaughter in treated fields.

DO NOT apply to cotton within 15 days of hand picking. Use only on recommended crops and at recommended dosages. DO NOT apply or allow to drift to area being grazed by dairy animals or animals being finished for slaughter or to area where there are unprotected human beings.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

KILL-A-PLENTY 162

1. Spray 162 on non-treated, freshly furrowed land or on non-treated susceptible pests
between meals. Do not spray if there is any indication of spray drift. If spray drift is likely,
avoid spraying near crops and other plants sensitive to spray drift. Do not spray near
streams, ditches, or at any time when there is a possibility of spray drift.

GENERAL DIRECTIONS

When spraying, a sprayer should be used. Use a sprayer of adequate capacity to avoid
contamination of adjacent areas.

APPLICATION: Apply 8 oz. of 162 to 100 gal. of water. Add the desired amount of 162 to the
water and then mix well. Then spray the desired areas. Do not spray the areas
recommended for the application of 162. Do not use 162 in conjunction with other
sprays.

DIRECTIONS FOR USE ON COTTON

FOR THRIPS AND COTTON FLEAHOPPERS, apply 1 pt. to 1 pt. per acre. For Boll Weevils and
resistant Boll Weevils, apply 2 pt. per acre. Do not apply more than 1 pt. per acre of
162 in any 10 day period.

FOR BOLL WEEVILS, apply 162 at the planting stage or after planting. Apply 162 at the
planting stage as soon as the cotton is planted. Apply 2 pt. per acre at the planting
stage. Apply 4 pt. per acre after planting. Do not apply 162 to cotton within 15 days of
hand picking. Do not spray or allow to drift to area being grazed by dairy animals or
animals being finished for slaughter. Do not apply or allow to drift to area where there
are unprotected human beings.

Do not apply 162 to cotton within 15 days of hand picking. Use only on recommended
crops and at recommended dosages. Do NOT apply or allow to drift to area being grazed
by dairy animals or animals being finished for slaughter or to area where there are
unprotected human beings.

**Do not apply to cotton within 15 days of hand picking. Use only on recommended

crops and at recommended dosages. DO NOT apply or allow to drift to area being

grazed by dairy animals or animals being finished for slaughter or to area where there

are unprotected human beings.**

INERT INGREDIENTS:

Methyl Parathion

WARNING

POISONOUS IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN.

See antidote statement and other warnings on the back/side panel.

KEEP OUT OF REACH OF CHILDREN.

PHYSICIAN'S NOTE

"This compound contains Endrin and Methyl Parathion." Methyl Parathion exerts muscarine-like effects, e.g., stimulation of the para-sympathetic nervous system. Repeated use of a para-sympathetic depressant, such as atropine, to the limit of patient's tolerance, is indicated to relieve symptoms. The administration of oxygen is helpful. Never give morphine to patients suspected of Parathion poisoning.

In cases of poisoning with Endrin barbiturates as for anti-convulsant therapy are administered. Observe patient carefully since repeated treatment may be necessary.

USDA Registration No. 3677-59
