

GENERAL DIRECTIONS

This product is an emulsifiable insecticide containing 8 pounds of Chlordane per gallon. It is formulated to enable the user to easily prepare water dilutions of varying strengths. It can be used in hand sprayers, conventional hydraulic sprayers, hose sprayers, low-volume ground applicators and sprinkling cans.

WARNING DIRECTIONS FOR USE

TERMITE CONTROL IN BUILDINGS: Prepare a ready to use 1% emulsion by diluting 1 quart of Kill-A-Plenty Chlordane 8 in 25 gallons of water. The diluted material should be applied at the rate of 1 gallon per linear foot of a trench 1 foot wide and 2½ feet deep.

PRECONSTRUCTION: Apply 1 gallon finished emulsion per 10 square feet over the entire building site. Make two applications along critical areas of walls and entrances.

FOR ESTABLISHED HOUSES WITH CRAWL-SPACE AND HOMES WITH BASEMENT: (a) Apply 2 gallons per 5 lineal feet as a trenching application to critical areas under the house, such as along the inside of foundation walls and around piers and utility entrances. If trench is deeper than 15-18 inches, apply 4 gallons per 5 lineal feet. (b) Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation walls, including entrance platforms and porches where the foundation is not more than 15-18 inches deep. If over 15-18 inches deep but not over 30 inches deep, apply 4 gallons per 5 lineal feet of trench.

SHADE TREES, ORNAMENTALS, PERENNIALS AND ANNUALS: A spray should be prepared by adding 1 pint Chlordane to 100 gallons of water and applied to shade trees, ornamentals, perennials and annuals for the control of: Armyworms, Cutworms, Fall Armyworms, Japanese Beetle Adults, June Beetle Adults and May Beetles.

"DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME."

Chlordane 8

ACTIVE INGREDIENTS:
