

## DIRECTIONS FOR USE

**HOUSEHOLD INSECTS:** Roaches, Ants, Spiders, Silverfish, Crickets, Clover Mites, Earwigs. In and about homes, dairies and food processing plants use 3% malathion in either water or deodorized kerosene. To make a water solution, dilute 3 tablespoons of 57% malathion emulsifiable liquid in 1 quart of water (6½ oz. per gallon). To make an oil solution, dilute 1 part of 57% malathion emulsifiable liquid in 19 parts of a mixture consisting of 4 parts kerosene-type solvent and 1 part aromatic hydrocarbon-type solvent. Apply by means of coarse spray or paint brush or low-pressure spray bomb to window sills, baseboards, drainboards, under sinks and stoves, and to other areas frequented by insects. Spray surfaces until wet. Care should be taken to thoroughly treat all cracks and crevices. Water based spray may stain finished surfaces. **AVOID CONTAMINATION OF FOOD, UTENSILS, MILK, MILK EQUIPMENT AND WATER.**

**CARPET BEETLES, CLOTHES MOTHS:** Use a 3% malathion water or oil based spray. Apply to baseboards, floors (including areas under carpets, along margins of carpets and in closets), behind radiators and other lint-accumulations areas, on closet shelves and walls, and on infested surface areas of carpeting. Applications above will also control clothes moth larvae in these locations. If clothing or woolen goods are to be protected from attack by clothes moths, they should receive regular treatment with a suitable moth proofing material. Spray surfaces until wet. Care should be taken to thoroughly treat all cracks and crevices. Water based sprays may stain finished surfaces.

**BEDBUGS:** Use Kill A Plenty Premium Malathion at a rate of 2 to 4 tablespoons per gallon of deodorized kerosene. Apply lightly to all mattress surfaces in sufficient quantity to "mist" the fabric and apply generously to beds and woodwork with special care taken to wet all possible hiding places.

## KILL A PLENTY PREMIUM MALATHION

Contains 5 Pounds Malathion per gallon  
57% Emulsifiable Liquid Premium Grade

<b>ACTIVE INGREDIENTS:</b>		
Malathion*		56.7%
Xylene		35.3%
<b>INERT INGREDIENTS:</b>		8.0%
	<b>TOTAL</b>	<b>100.0%</b>

\*O,O dimethyl dithiophosphate of diethyl mercaptosuccinate

### CAUTION

HARMFUL IF SWALLOWED

Avoid prolonged breathing of spray mist. Avoid prolonged or repeated contact with skin. Wash thoroughly. Avoid contamination of feed and foodstuffs. Keep container closed and away from heat and open flame.

### KEEP OUT OF REACH OF CHILDREN

Note to Physicians: Malathion, upon repeated, prolonged careless use, may cause cholinesterase inhibition. Atropine is antidotal.

**STORED GRAINS:** For the protection of stored grains (such as wheat, oats, rice, corn, rye, barley, grain sorghum, unshelled peanuts, and field or garden seeds) against confused flour beetles, rice weevils, granary weevils, saw-toothed grain beetles, flat grain beetles, red flour beetles, rusty grain beetles, lesser grain borers, and Indian meal moths, apply as the grain is being loaded or turned into final storage: 1 pint of Kill-A-Plenty premium Malathion in 2 to 5 gallons of water per 1000 bushels. Field and garden seeds can be protected against the above grain pests with a dosage of 1/2 pint of Kill-A-Plenty Premium Malathion in 1 to 2 1/2 gals. of water per 500 bushels of seed. To protect stored grains from attack by Indian meal moths, apply to the surface of clean or uninfested grain 1/2 pint of Kill-A-Plenty Premium Malathion in 1 to 2 gals. of water per 1000 sq. ft. of grain surface area. Apply the spray evenly over the surface of the grain. Apply immediately after grain is loaded into storage and repeat if necessary. For a residual wall, floor, and machinery spray in grain elevators, in treating truck beds, box cars, and ships' holds before loading grain, apply 1 gallon of Kill-A-Plenty Premium Malathion per 25 gals. of water making thorough applications. Before applying spray, clean elevators, box cars, etc., thoroughly. Remove and burn all sweepings and debris.

**PEANUTS:** Use good spray equipment. Apply coarse spray uniformly. Preferably use a suitable mechanical spray applicator that regulates the rate of application to the flow of peanuts. Adjust the operating pressure of spray pump and size of nozzle opening to correlate the amount of spray delivery with the rate of flow of peanuts being treated. Avoid spraying with a fine mist that drifts away, by using slow nozzle pressure. Shield the nozzle against wind and air currents.

**RESIDUAL WAREHOUSE SPRAY -- BEFORE STORING PEANUTS:** Clean warehouse thoroughly of trash and remains of old peanuts 1-2 weeks before new peanut crop is stored. Then, thoroughly spray the interior of the empty warehouse, especially cracks and protected places. Treat outside walls to a height of 6-8 feet and the ground to a distance of 6 feet from the warehouse. Use 1 pint of Kill-A-Plenty Premium Malathion in sufficient water to make 2 1/2 gals. of spray or, 1 gal. with 19 gals. of water. Apply as a coarse spray at the rate of 2 gals. per 1000 sq. ft. of surface or to run off.

**BULK SPRAY TREATMENT -- PEANUTS GOING INTO STORAGE:** Use Kill-A-Plenty Premium Malathion at the rate of 2 1/2 pints in 5 gals. of water for each 15 tons of farmers' stock peanuts as they go into storage.
