GENERAL INFORMATION

Protex-A-Plenty Seedpro Seed Protectant is recommended for the treatment of soybeans, snapbeans, dry beans, cowpeas, peas, lima beans and peanuts. Protex-A-Plenty Seedpro when used as directed will usually increase stands and yields by reducing losses from seed decay, damping-off and seedling blights caused by many seedborne fungi.

**DIRECTIONS**

Protex-A-Plenty Seedpro Seed Protectant is formulated for dry treatment of seed.

For use on SOYBEANS, DRY BEANS, SNAPBEANS, COWPEAS, PEAS:  
Apply 4 ounces per bushel or 5 ounces

on 10 gallons of seed. (8 gallons per bushel)

For use on LIMA BEANS: Apply 6 ounces per bushel or 7 1/2 ounces on 10 gallons of seed.

For use on Shelled Peanuts: Apply 9 ounces per bu.

Treated legume seed can be inoculated. First treat with Protex-A-Plenty Seedpro and then inoculate just before planting.

ACCEPTED WITH COMMENTS

**CAUTION**

May cause irritation of eyes, nose, throat, and skin. Avoid breathing dust. Avoid contact with skin, eyes, and clothing. Wash thoroughly after handling.

In case of contact, flush with plenty of water; for eyes get medical attention.

**IMPORTANT**

Avoid handling this product or treated seeds with bare hands. Use of a dry filter dust mask is recommended.

**LABEL TREATED SEED** - This seed treated with thiram fungicide Seedpro. Do not use for food, feed or oil purposes.
