GENERAL INFORMATION

RIVERSIDE STAND 10G is recommended for use as an in-furrow soil treatment at planting time, for the control of certain cotton seedling diseases. It is to be used as an adjunct to standard fungicide seed treatment.

When used as directed, RIVERSIDE STAND 10G can be expected to improve stands and plant vigor through the suppression of seedling blights, damp off, and soreshin caused by such organisms as Rhizoctonia, Phythium, and Sclerotium rolfsii.

When used under adverse weather conditions there may be some delay in emergence, stunting of seedlings, or reduction in stand. These effects may be more pronounced in light sandy soils. Plant injury may also occur when certain pre-emergence herbicides are used after application of this product.

DIRECTIONS FOR USE

Apply as a soil in-furrow application at planting time with a granular applicator properly calibrated to assure accurate placement in the drill slightly below the seed zone.

Soil Type	APPLICATION RATE-LBS. PER ACRE (12,000 to 14,000 Row Feet)	
	Drill	
Light	10	
Medium	15	
Heavy	20	

Soil temperature, moisture, and tillage should be favorable for good germination and emergence.

DISPOSAL OF CONTAINER AND WASTES

Destroy all containers when empty by punching holes in them and burying with wastes. Do not burn. Do not reuse containers for other purposes. Dispose of waste by burying in non-crop lands away from water supplies.

NOTICE
