CAUTION**

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. Have victim lie down and keep quiet. Never give anything by mouth to an unconscious person. Get medical attention immediately.

IF INHALED: Remove victim to fresh air and apply respiration if indicated.

IF IN EYES: Rinse eyes for at least 15 minutes with water and call a physician immediately.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly.

**SEE LEFT PANEL FOR ADDITIONAL
PRECAUTIONARY STATEMENTS**

GENERAL INFORMATION

RIVERSIDE PRIME OIL 70 is a blend of special surfactant with phytolend monophosphate oil in the 70 second viscosity range.

DIRECTIONS FOR USE —

PREPARATION WITH APPLICATION OF SPRAY EMULSIONS

Fill spray tank half full of water, add the proper amount of herbicide while agitating and then add RIVERSIDE PRIME OIL 70. Continue to agitate while finishing filling and agitate before and during each application to insure a uniform spray emulsion.

DIRECTION FOR USE — WITH FUNGICIDES

Use 1 pint to 1 qt. wt of RIVERSIDE PRIME OIL 70 per acre of crop treated. RIVERSIDE PRIME OIL 70 is particularly suggested for use with BENLATE and BRANZATE 200 when they are used for the control of cercospora leaf spot and rust of peanuts.

Generally those using ground applicators will apply 20 to 100 gallons of spray per broadcast acre with proportionately less for band treatments. If airplane applications are to be made, apply at least 5 gallons of spray per acre.

Carefully read and follow the directions contained on the label of the fungicide with which RIVERSIDE PRIME OIL 70 is to be used. For local recommendations, consult competent agricultural authorities.

DIRECTION FOR USE — INSECT CONTROL

RIVERSIDE PRIME OIL 70 is useful for the control of certain insect pests of apples, peaches, plums, prunes, cherries, pears, pecans, and citrus fruits. General directions for its use are given in the table in the right panel. However, as cultural practices for these crops vary so much in different areas that specific information for use of RIVERSIDE PRIME OIL 70 for a particular crop listed should be obtained from your State Agricultural Extension Service. RIVERSIDE PRIME OIL 70 may be used in conjunction with certain insecticides or fungicides for use on apples, peaches, plums, prunes, cherries, pears, pecans, and citrus but only if the labels of the insecticides or fungicides give directions for use with spray oils. Such directions must be followed meticulously.
