

## Atrazine 90DF

### Supplemental Labeling

Supplemental Directions For The Use Of  
Atrazine 90DF  
EPA Reg. No. 9779-253

This labeling must be in the possession of the actual product user at the time of application.

#### TILE-TERRACED FIELDS CONTAINING STANDPIPES

To ensure protection of surface water from runoff through standpipes and tile outlets in terraced fields, any of the following options may be used:

- 1) Maintain a 66 foot setback around standpipes where this product may not be applied (this setback restriction applies to a standpipe when the connected tile outlet in a terraced field discharges within 66 feet of a point where field surface water runoff enters a perennial or intermittent stream or river), or
- 2) Apply this product within the 66-foot setback, but immediately incorporated into the soil after application to a depth of 2 to 3 inches within the entire area drained by the tile inlet, or
- 3) Apply this product within the 66-foot setback if no-till combined with high crop residue management practices are used in the entire area drained by the tile inlet. High crop residue management is interpreted to mean that little or no crop residue is removed from the field during or after crop harvest.

**NOTE:** Always consult the Atrazine 90DF label for other use directions and limitations.
