

® DURSBAN
0.5% GRANULAR INSECTICIDE

50 LBS. NET

CONTROLS CHINCH BUGS, SOD WEBWORMS (LAWN MOTHS), ANTS, BROWN DOG TICKS, CRICKETS, CUTWORMS, EARWIGS, SOWBUGS (PILLBUGS), CERTAIN WHITE GRUBS* AND HYPERODES (TURFGRASS) WEEVILS INFESTING HOME LAWNS AND OTHER ORNAMENTAL TURF AREAS**

ACTIVE INGREDIENT:

Chlorpyrifos (O, O-diethyl O-[3,5,6-trichloro-2-pyridyl] phosphorothioate) 0.5%

INERT INGREDIENTS: 99.5%

TOTAL 100.0%

*DURSBAN® – Trademark of The Dow Chemical Company
U.S. Patent No. 3,244,586

CAUTION

KEEP OUT OF REACH OF CHILDREN

May be harmful if swallowed. Do not get in eyes or on skin. Wash thoroughly after handling. Wash contaminated clothing before re-use. Flush contaminated eyes with plenty of water and get prompt medical attention. Avoid breathing vapors or dust particles. Avoid contacting food crops. Keep away from food, feedstuffs and domestic water supplies. Keep container closed. Keep children and pets off treated areas until this material is washed into the soil and grass is dry.

NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote.

USE DIRECTIONS

Apply DURSBAN 0.5% granular insecticide uniformly to home lawns and other ornamental and recreational turf grass areas using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear using DURSBAN 0.5% at the rate of 200 pounds per acre. To help obtain uniform distribution, apply one-half the required amount of product in one direction; then apply the balance at a right angle. Immediately after application sprinkle the turf with 1300 gallons of water per acre so as to wash the granules into the zone of insect infestation. Consult the following table to determine amounts of DURSBAN 0.5% and water needed for smaller sized areas. Re-treat as necessary.

RATES TO USE		
Area to be Treated	Pounds of DURSBAN 0.5%	Gallons of Water to Sprinkle on Turf after Treatment
1000 sq. ft.	5	30
5000 sq. ft.	25	150
10700 sq. ft.	50	325

*To control certain white grub (larvae of European chafer and Japanese beetle) use two to four times the amounts of DRUSBAN 0.5% shown in the table, i.e., 10 to 20 pounds per 1,000 sq. ft. Apply the granules uniformly over the area treated followed immediately by thorough watering to wash the insecticide into the turf. For best results treat when grubs are young and actively feeding near the soil surface, usually during late July and August. Consult your local Agricultural Extension Service specialist for proper time to treat in your area.

**To control Hyperodes (turfgrass) weevils use twice the rate of DURSBAN 0.5% shown in the table. Treat suspected problem areas in mid-April and again in mid-May. Consult your local Agricultural Extension Service specialist for best time to treat in your area.

ENVIRONMENTAL CAUTIONS

This product is toxic to fish, birds and other wildlife. Birds and other wildlife in treated areas may be killed. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

CONTAINER DISPOSAL

Dispose of empty container and wastes by burning or by burying in non-croplands away from domestic water supplies.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
