

POTATO SEED-PIECE FUNGICIDE

DIRECTIONS FOR USE (Cont.)

Potato Seed-Piece Fungicide Dust is a special fungicide dust formulation for application to whole or cut Potato tubers to protect them from seed-piece decay caused by fusarium seed-piece decay (*Fusarium sambucinum*, and seed born, Common Scab)

Use 1 lbs. of Potato Seed-Piece Fungicide Dust per 100 lbs. of whole or cut potato seed-pieces. Apply the dust in such a manner that the entire surface of the seed-piece becomes thoroughly covered with the fungicide dust.

Place potato seed-pieces in clean containers, and plant as soon after treatment as possible. (Refer to WORKER SAFETY RULES for description of required protective clothing (Gloves, etc.) when using this product. After treating spread "coated seed-pieces" in a cool dry place if held before planting. Containers used must be labeled:

WARNING: POTATOES TREATED WITH MANCOZEB FUNGICIDE DO NOT USE FOR FOOD OR FEED. Do not use treated seed potatoes for food or feed purposes.

NOTICE: Buyer and user assume all risk and liability of use, storage and/or handling of this product not in accordance with the terms of this label.
